Quince

Team G27

Own the Second Purchase

Turning viral first buyers into repeat customers with the same $120M

24% → 31%	−12 to −14%	$0
90-day repeat	blended CAC	new budget

Retargeting and lifecycle strategy · Grounded in Adobe Customer Journey Analytics

Case Competition World Cup · Graduate Track · October 2026

Win the second purchase: repeat to 31%, same budget

Quince G27

Move $9M of the fixed $120M from rented to owned channels to win the second purchase

Three levers: Capture every buyer (★ Quince Passport) · Win the Golden Month (★ Material Journeys) · Never pay twice (★ Never Pay Twice Engine) · 0 discounts

3 **Rising rented-reach costs put the $10B valuation at risk**
CAC +29% to $62; 60% of the budget is rented from three social platforms — **$62 CAC**

4 **Engagement after order one decides who buys twice**
77% of carts never order; engaged buyers repeat 28.1% vs 4.7% — **28.1% vs 4.7%**

5 **Rivals copy a discount in a day, not trust**
Amazon wins paid retargeting; Shein bought Everlane, whose email was no moat — **1 day vs 9–12 mo**

6 **Data is ready; the lifecycle muscle must be built**
Identity is ready in CJA; team, app and activation are funded inside the $120M — **$6.0M funded**

7 **Prove in 90 days, then scale by month nine**
South pilot with a 10% holdout; fail Gate 1 and the money goes back — **$4M moves first**

24% → ~31%
90-day repeat (target ≥ 30%)

−12 to −14%
blended CAC (target −10%)

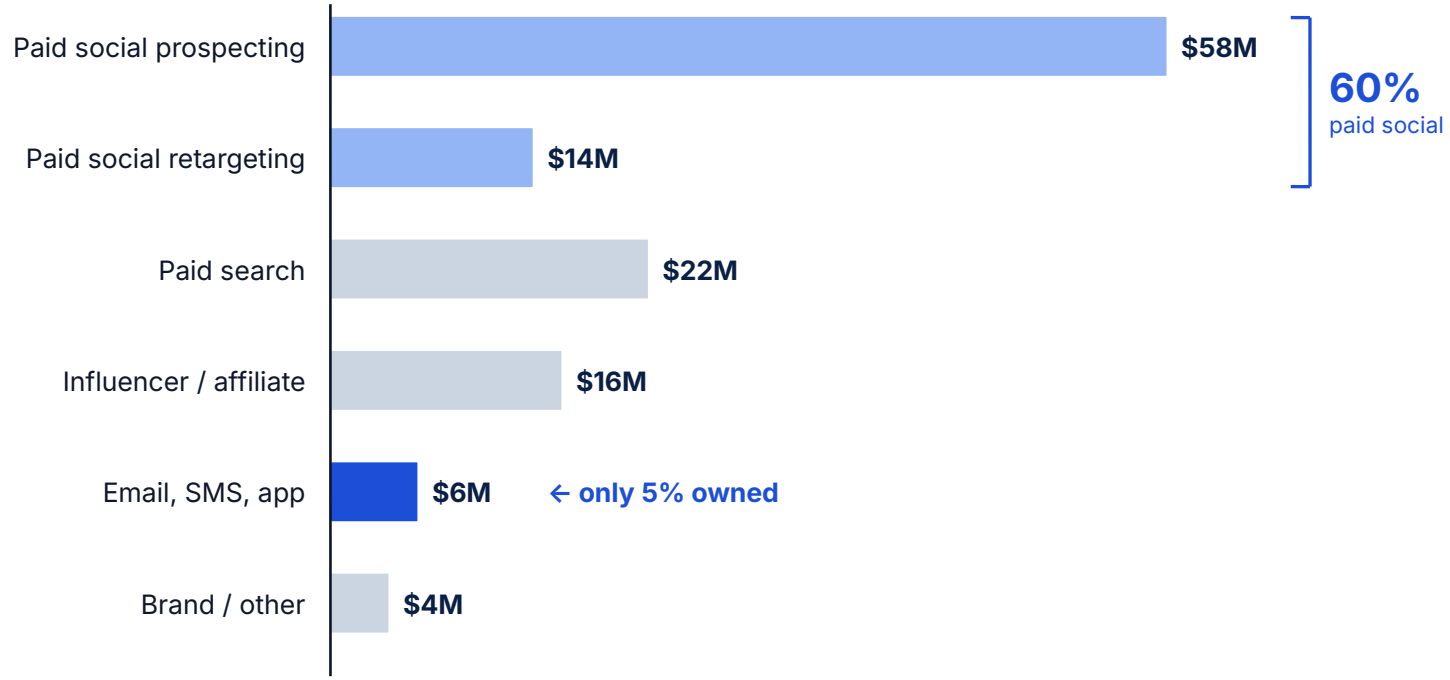

✓ No budget increase ✓ No price-led retention ✓ Grounded in Adobe CJA

Source: Adobe CJA, Quince Case Data View, Jan–Apr 2026; case Exhibits D, G, H, J, M; team estimates. Lever effects are gross before haircuts; the base case nets them to 31%.

Rising rented-reach costs put the $10B valuation at risk

Quince G27

Fixed FY2026 paid marketing budget, $M (total $120M)

Rented from platforms Quince doesn't control:

1 Signal loss hits retargeting first

iOS opt-in is ~35–50%; Safari and Firefox block cookies. Retargeting's $31 CAC also counts sales that would happen anyway.

2 Rising CAC threatens the valuation

Blended CAC is up 29% in two years ($48 → $62). The $10.1B valuation prices in a lifestyle brand, not a dupe that rents every customer.

3 First-party data compounds

App-installed customers are worth $410 over three years vs $155 for web-only: 2.6×.

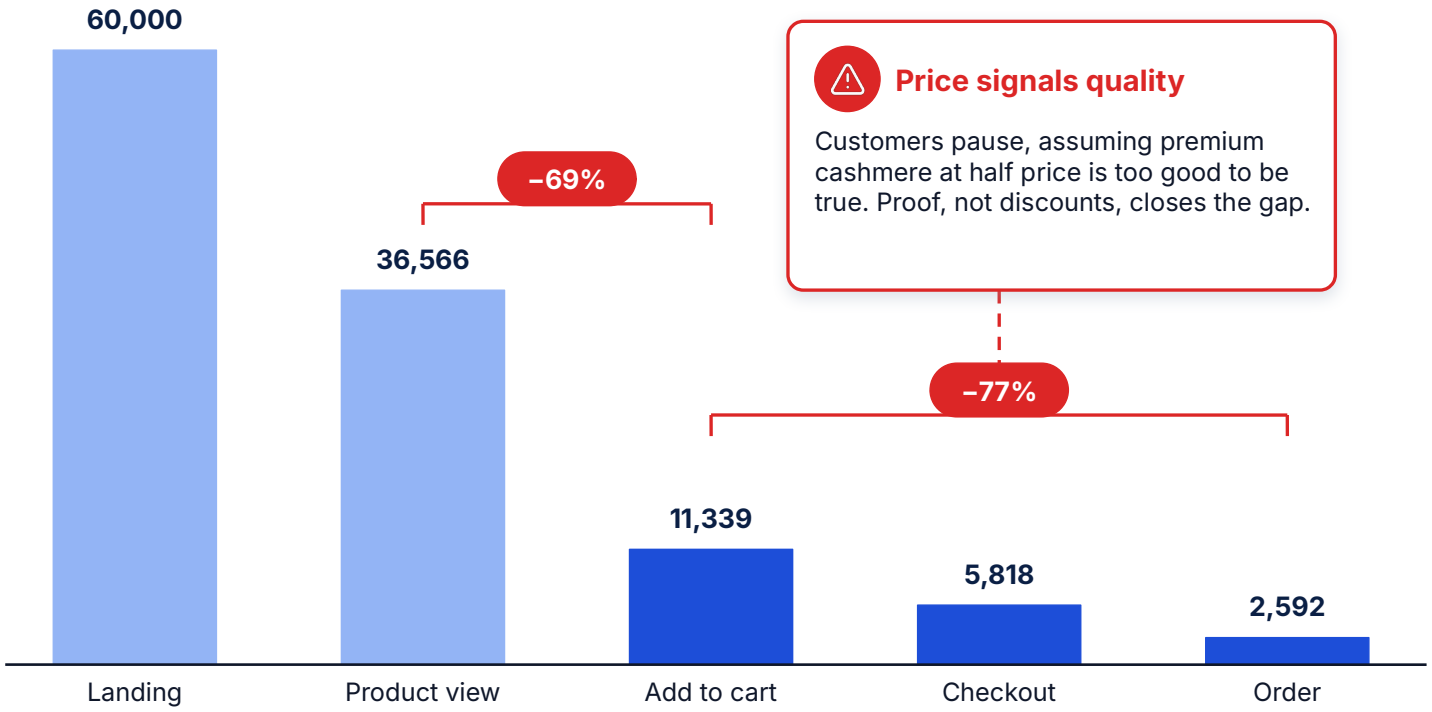

Quince rents 60% of its reach and spends just $1.43 per customer on the reach it owns

Source: case Exhibits D, G, H (illustrative); Reuters (Mar 2026, $10.1B valuation); Adjust and AppsFlyer ATT opt-in benchmarks.

Engagement after order one decides who buys twice

Quince G27

Where the funnel breaks: people at each step (Adobe CJA Fallout)

1 message follows 11,610 cart adds

Cart abandoners hear nothing, so recovery is new money (Flow).

Engaged buyers repeat 28.1% vs 4.7%

App users after order one still repeat 21.5%, 4.6× the non-engaged baseline (segments).

Week 2 is when buyers come back

5.6% of engaged buyers return in week 2 vs 2.1% of all buyers; half return in weeks 1–4 (Cohort Table).

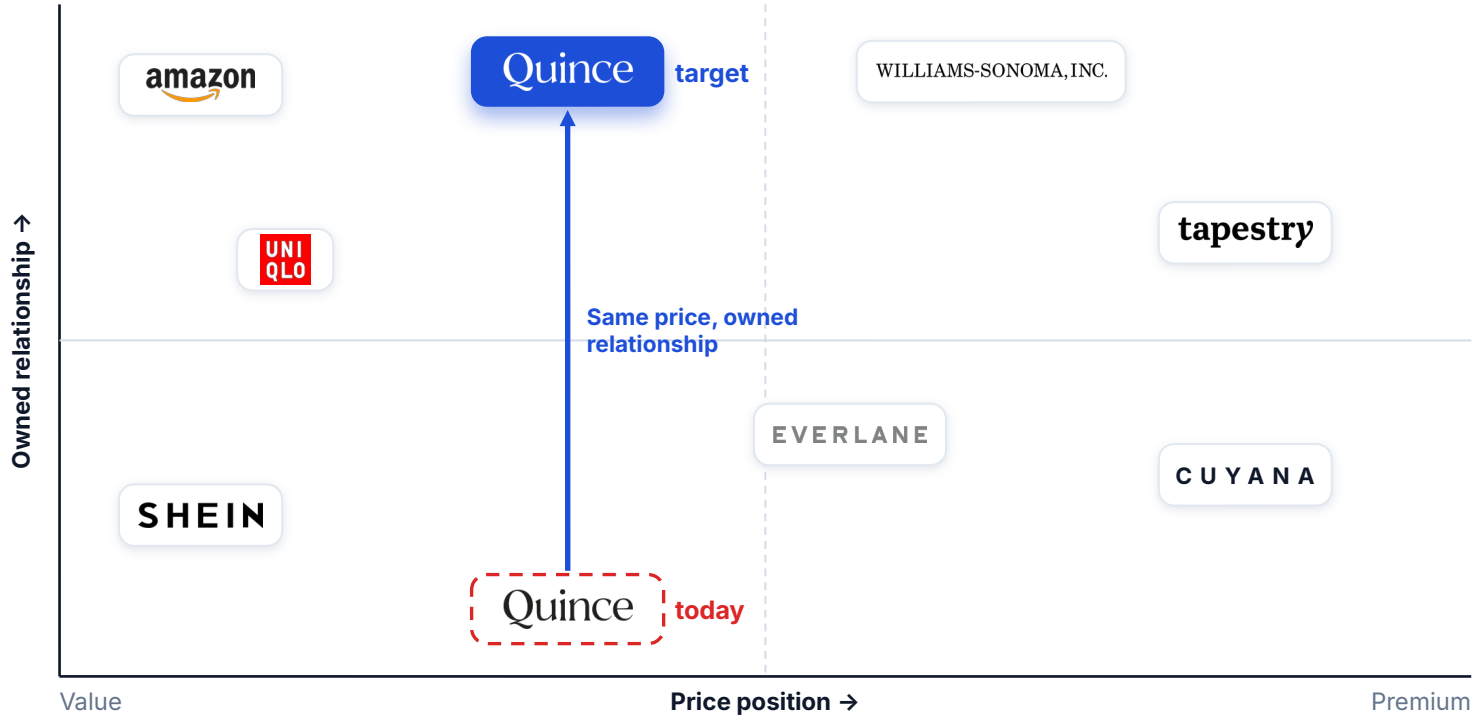

Target abandoners within hours, every buyer at delivery, engaged buyers in weeks 1–4

Source: Adobe CJA, Quince Case Data View, 1 Jan–30 Apr 2026, 60,000 people: Fallout, Flow, Cohort Table, segments (appendix). The price-signal mechanism is a hypothesis the pilot tests.

Rivals copy a discount in a day, not trust

Quince G27

Price position vs depth of owned customer relationship (team judgment)

1 Value price, rented relationship

Quince prices with Uniqlo and Shein but owns less of its customer than Williams-Sonoma or Tapestry. Amazon wins any paid-retargeting war.

2 A discount copies in a day; trust in a year

A 20% code is matched in 1 day; a 12-month triggered lifecycle program takes 9–12 months. Everlane's email was no moat: Shein bought it in May 2026.

3 If rivals escalate, hold price

If rivals discount or bid up audiences, Quince answers with proof and access, with owned share already 5% → 11%.

Quince's moat is M2C cost plus a known, consented, reachable customer base

Source: case Exhibit M; press on Shein's purchase of Everlane (May 2026); map positions and time-to-copy are team judgment.

Data is ready; the lifecycle muscle must be built

Quince G27

From batch-and-blast to logistics-integrated retention pods: $6.0M funds every gap, inside the $7.5M owned build

Engaged buyers (right) return 2.7× more in week 2 than all buyers (left), 5.6% vs 2.1%, and half return in weeks 1–4: the first month is when to act

Source: Adobe CJA, Cohort Table, inclusion and return Orders ≥ 1, weekly; right panel uses the Engaged inclusion segment, 1 Jan–30 Apr 2026.

Flow: almost no message follows an abandoned cart

Quince G27

If asked: "Doesn't Quince already email cart abandoners?"

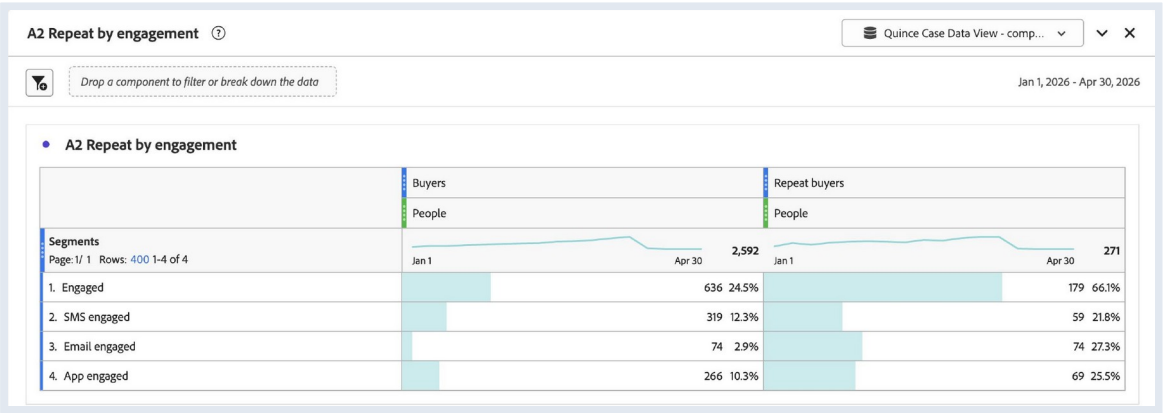

Only 1 of 11,610 cart adds is followed by an email, so a basic cart-recovery journey is the fastest win

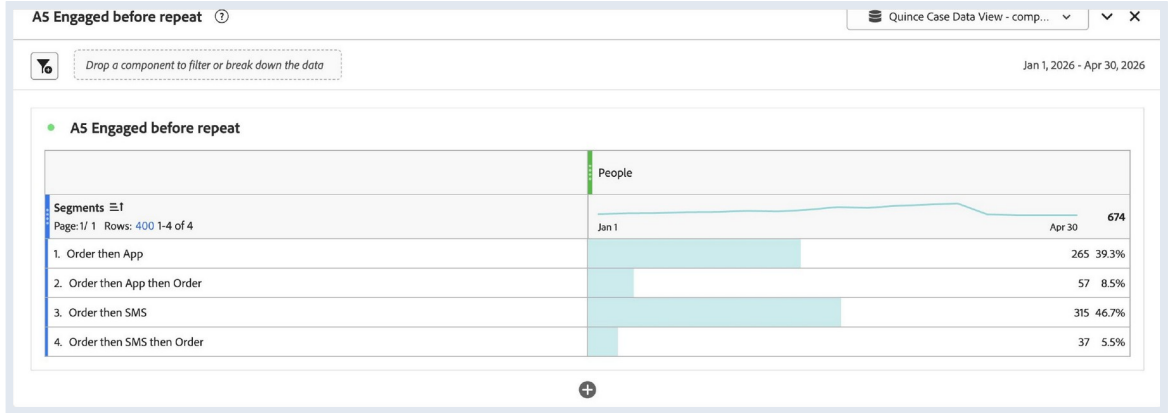

Source: Adobe CJA, Flow from add_to_cart, Person container, 1 Jan–30 Apr 2026.

Segments: engagement after order one drives repeat

Quince G27

If asked: "Is engagement cause or just a sign of loyal buyers?" (the 10% holdout tests it)

Engaged buyers are 24.5% of buyers but 66% of repeaters (left); after order one, app users repeat 21.5% vs 11.7% for SMS (right): engage buyers, don't buy traffic

Source: Adobe CJA, freeform tables with engagement segments (A2) and sequential segments after order one (A5), 1 Jan–30 Apr 2026.

Each option covers another's weakness, so we blend all three

Quince G27

B Option B

Paid precision and suppression

- ✓ Results in weeks, $0 incremental
- ✗ Alone: High signal-loss exposure; builds no lasting relationship

A Option A

Owned lifecycle precision

- ✓ Lowest cost per touch; insulated from ATT
- ✗ Alone: Reach capped by today's list: 1 in 4 buyers engaged

C Option C

Attribution-based reallocation

- ✓ The lasting decision framework
- ✗ Alone: 6–12 months to trust; high change risk

Funds it
Suppression frees $4M in months 1–3

Builds it
Capture grows the list; journeys earn order two

Proves it
Runs from day 1 and decides every tranche

B's speed pays for A's build, A's owned reach cuts B's signal-loss exposure, and C's holdouts remove the measurement risk of both

→ **Scale if the pilot beats the holdout by 2+ pts on 30-day repeat; stop and return the tranche if it doesn't**

Source: case section 4 (Options A, B, C), Exhibit I (cost and timing) and Exhibit K (risk matrix); team analysis.

Four branches, three levers, one thread

Quince G27

Why is 90-day repeat 24% and blended CAC $62 on a fixed $120M?

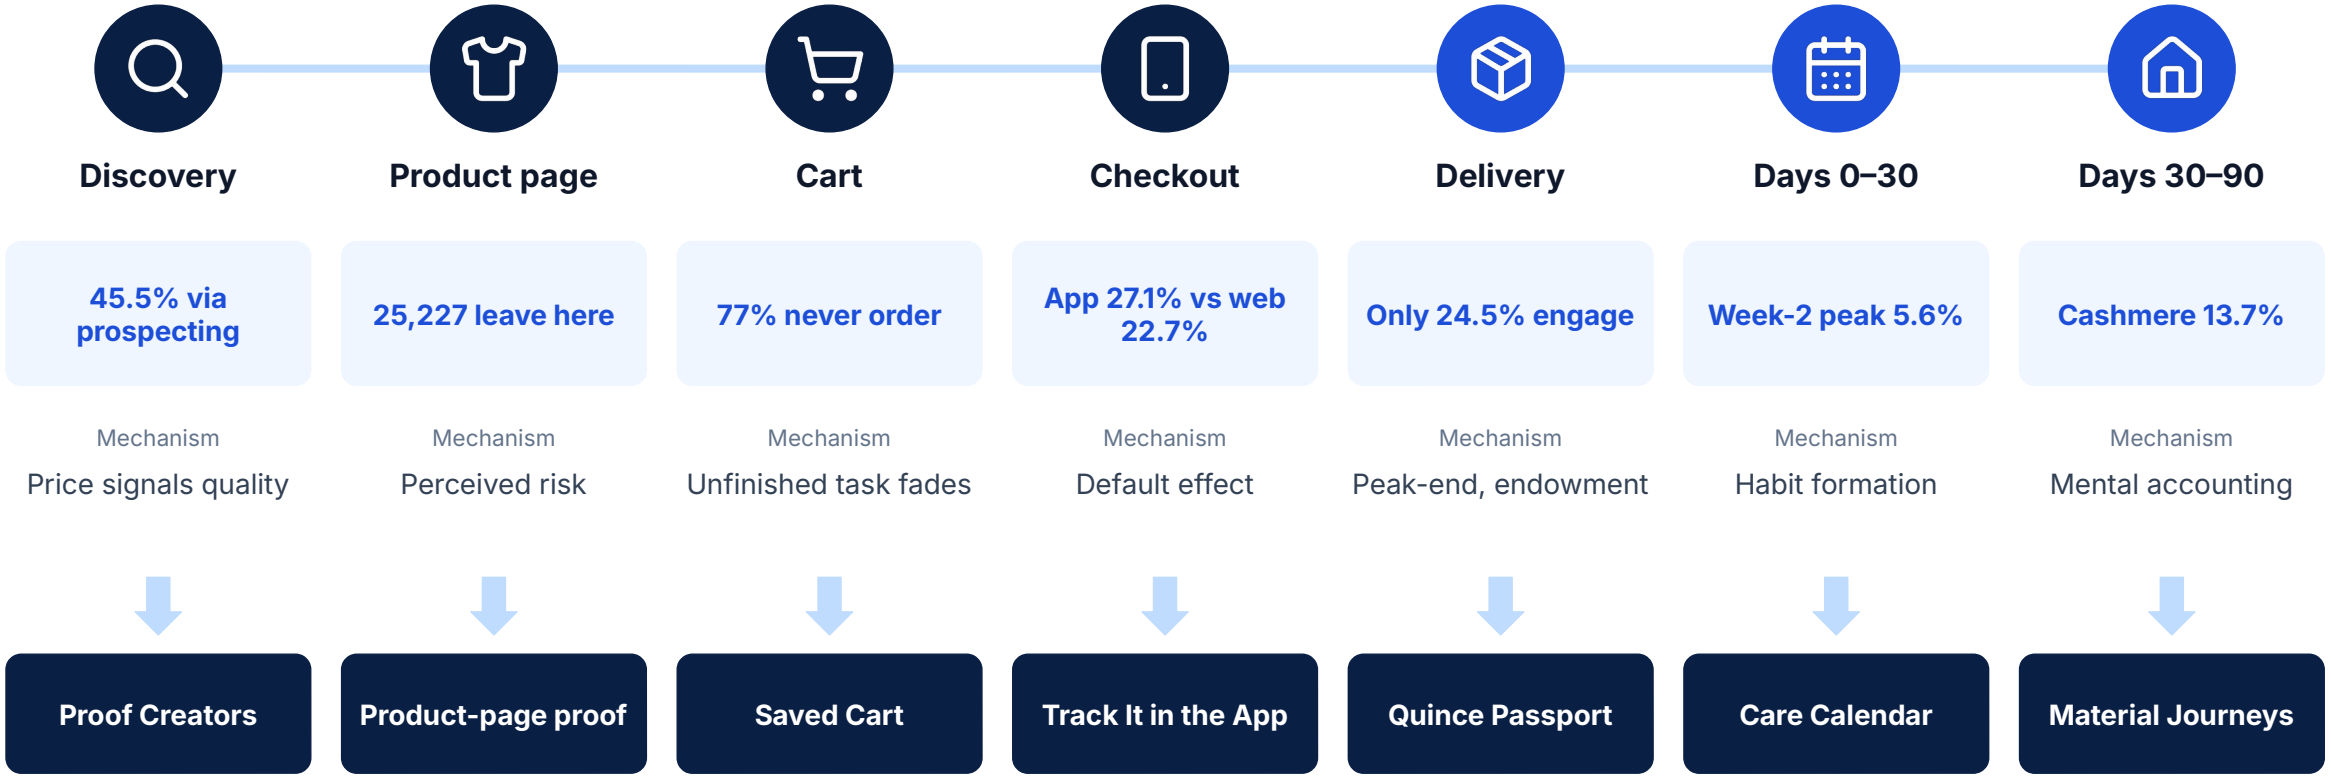

Money	**Spend is over-credited** Retargeted buyers repeat like organic: 23.0% vs 23.4%	**Never pay twice**
Customer mind	**One-product buyers** Cashmere: 40.7% of buyers, 13.7% repeat	**Win the Golden Month**
Customer journey	**The purchase leaks** 77% of carts never order; 1 message per 11,610	**Capture every buyer**
Brand trust	**Found, not yet trusted** 25,227 leave after a product view	**Trust thread, all levers**

Repeat = engaged share × engaged repeat + non-engaged share × non-engaged repeat; CAC = $120M ÷ new customers

Source: team analysis; Adobe CJA panels A1–A6; case Exhibits D and G.

Seven moments decide whether a first buyer returns

Quince G27

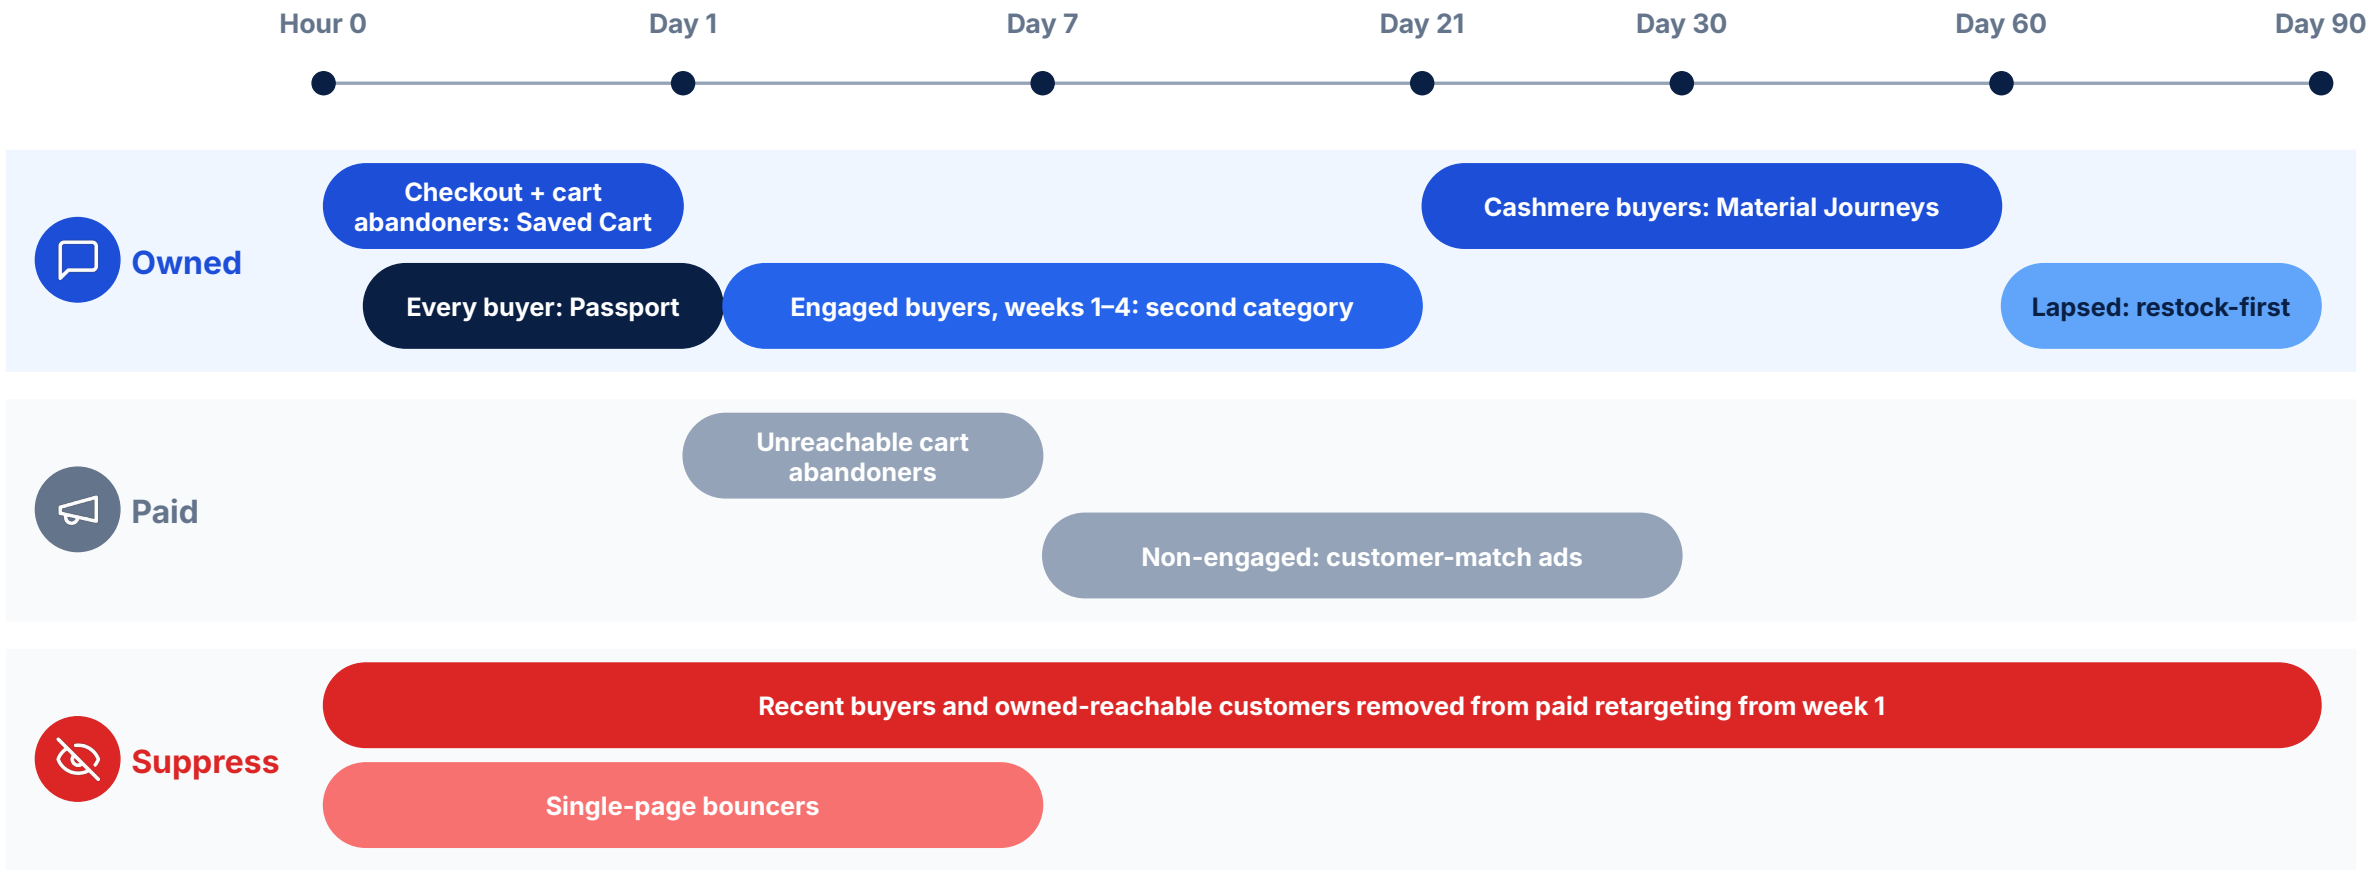

Trust peaks when the parcel opens: Quince asks for the relationship then, and never with a discount

Source: Adobe CJA panels A1, A2, A4, A5, A6 and Cohort Table; mechanisms are hypotheses the pilot tests.

Owned channels first; paid only where owned can't reach

Quince G27

Paid retargeting keeps one job: reaching high-intent people Quince has no other way to contact

Source: Adobe CJA segments (A1, A2, A4, A6, Cohort Table); team targeting plan. Every segment is a saved CJA segment that drives both message and measurement.

Fourteen programs, three flagships, zero discounts

Quince G27

1 Capture every buyer

★ Quince Passport
Box card: register your piece for care, exchange, restock-first

Track It in the App
Order tracking opens in the app by default; SMS fallback

Saved Cart
Reminders within hours with fit and return promise

Restock-First Waitlist
"Text me when it's back" for real sell-outs

2 Win the Golden Month

★ Material Journeys
Cashmere buyer → throw or linen sheets, by season

Care Calendar
Seasonal care reminders keep cashmere buyers close

Gift Ledger
Saved dates trigger picks 14 days before

Quince Insider
Early access earned by engagement, not spend

Beauty Refill
Refill reminders timed to each product's use cycle

Cashmere Second Life
Take-back for recycling, rewarded with early access

3 Never pay twice

★ Never Pay Twice Engine
CJA audiences suppress owned buyers from paid ads daily

Loyalist Lookalikes
Seed half of prospecting on repeat buyers

Proof Creators
Wear-tests and fabric close-ups, $1.5M from search

The Fitting Room
Members-only holiday pop-up; entry through the app

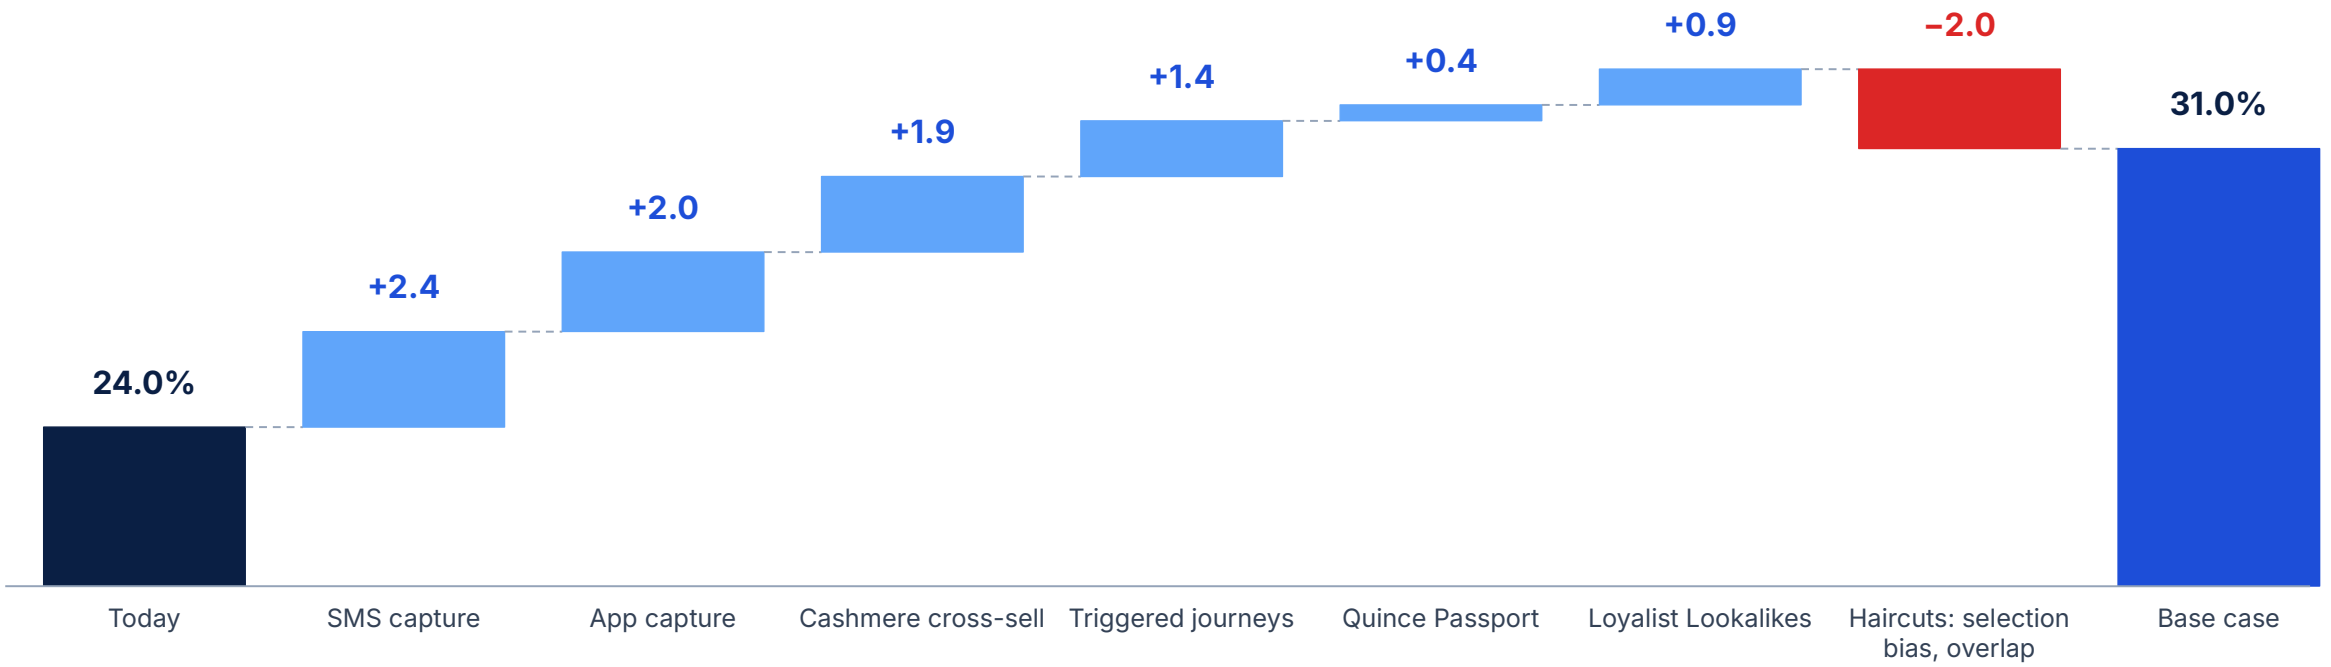

14 programs **0** discounts **14** CJA tests **$0** new budget

Source: team strategy. Each program sits inside one lever, works on one named behaviour and has a KPI CJA can read.

Seven levers lift 90-day repeat from 24% to about 31%

Quince G27

Gross	Base	Downside	Downside + buffers
33.0%	31.0%	29.5%	30.0%

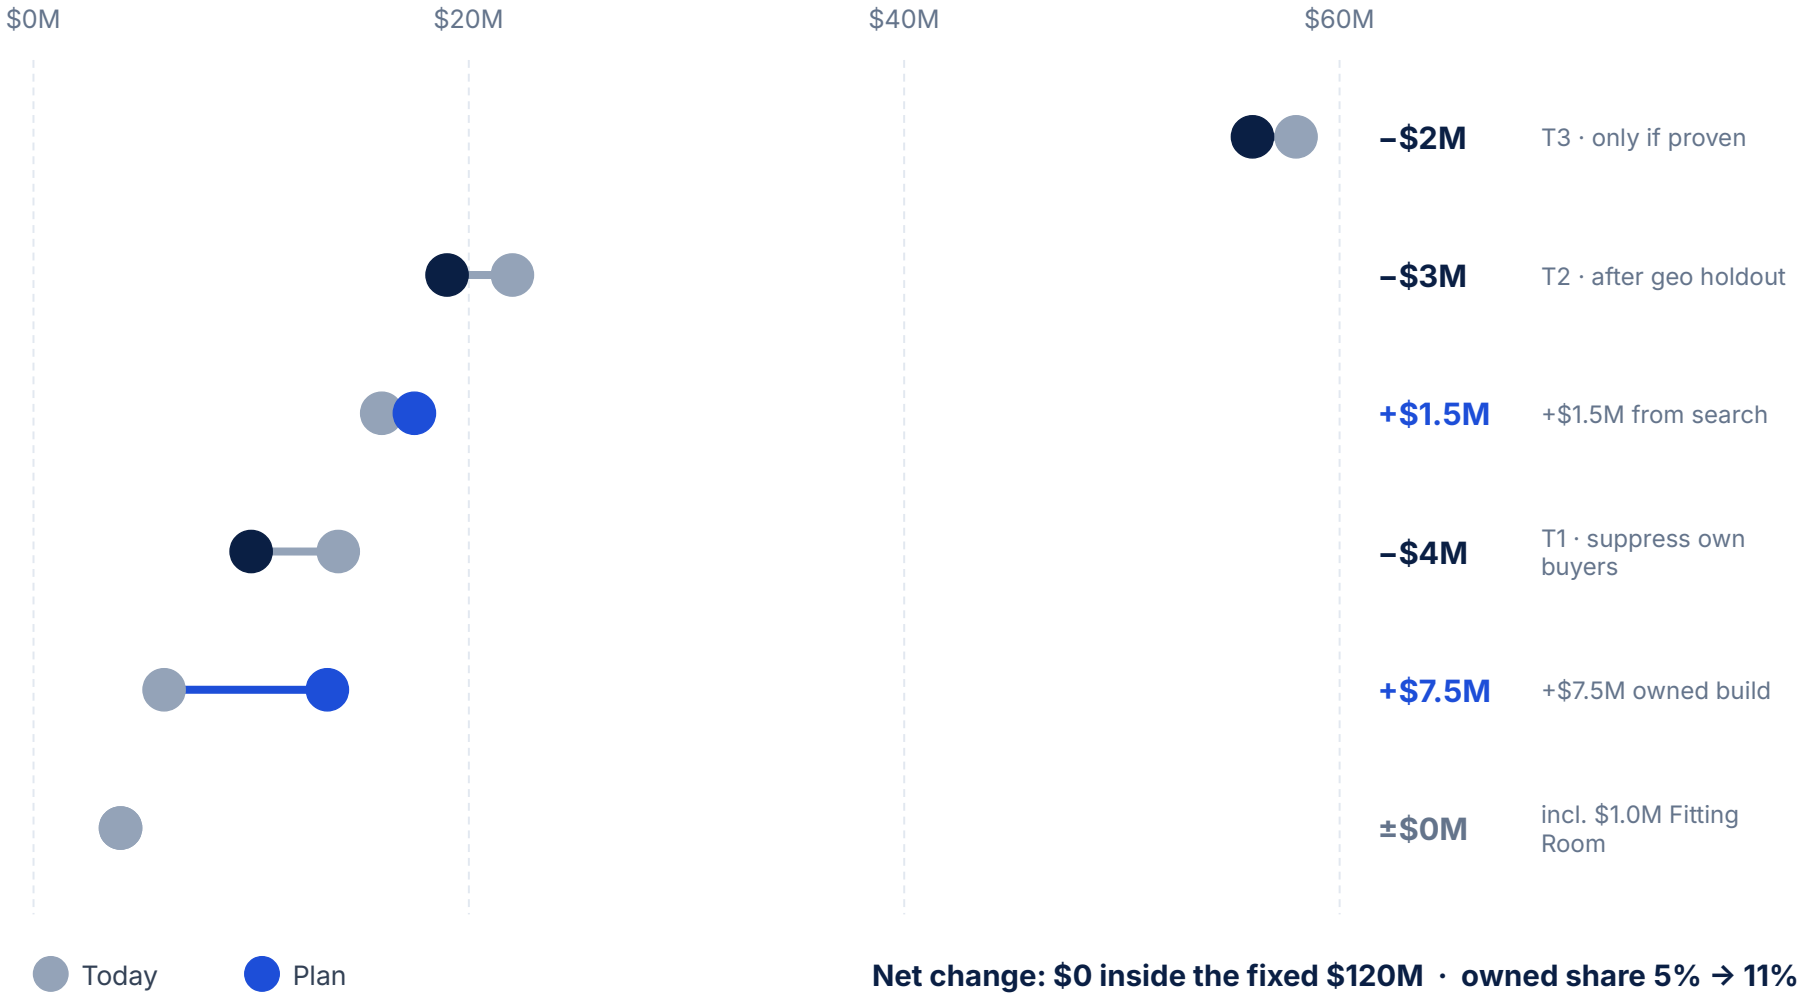

Axis starts at 20%

Source: case Exhibits E and J (baseline 24%); Adobe CJA A2/A5 for measured haircuts (app 17%, SMS 37%); new-lever sizes are team estimates.

$9M shifts from rented spend to owned channels

Quince G27

Paid social prospecting	–$2M	T3 · only if proven
Paid search	–$3M	T2 · after geo holdout
Influencer and creators	+$1.5M	+$1.5M from search
Paid social retargeting	–$4M	T1 · suppress own buyers
Email, SMS, app	+$7.5M	+$7.5M owned build
Brand and other	±$0M	incl. $1.0M Fitting Room

Net change: $0 inside the fixed $120M · owned share 5% → 11%

Source: case Exhibit G (today); team plan (tranches T1–T3 gated by CJA holdouts). Brand/other holds $4M, of which $1.0M funds the Fitting Room test.

The same $120M earns about $25M more contribution a year

Quince G27

Contribution added per year, $M

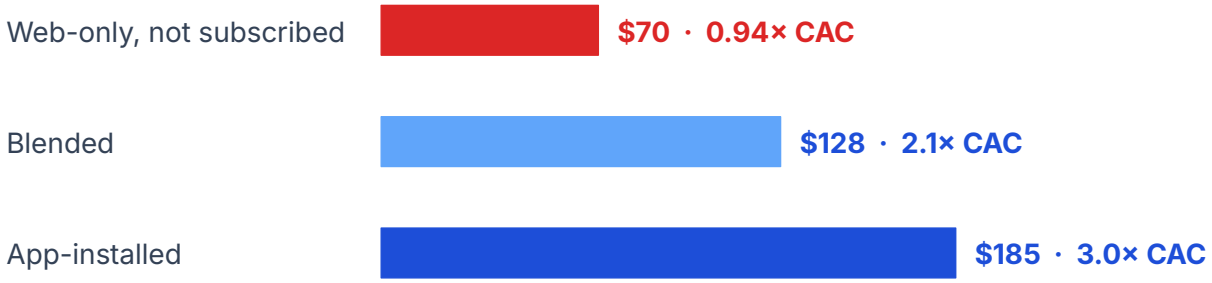

≈ $25M

Repeat at +7 pts

~170K extra new customers

Lifetime margin per customer vs CAC

3-year LTV × 45% margin, $; web-only vs prospecting CAC $74, others vs $62

Blended CAC, measured two ways

Effective CAC (case's Exhibit J measure)

$62 → ~$54 **−12% to −14%**

Strict new-customer CAC

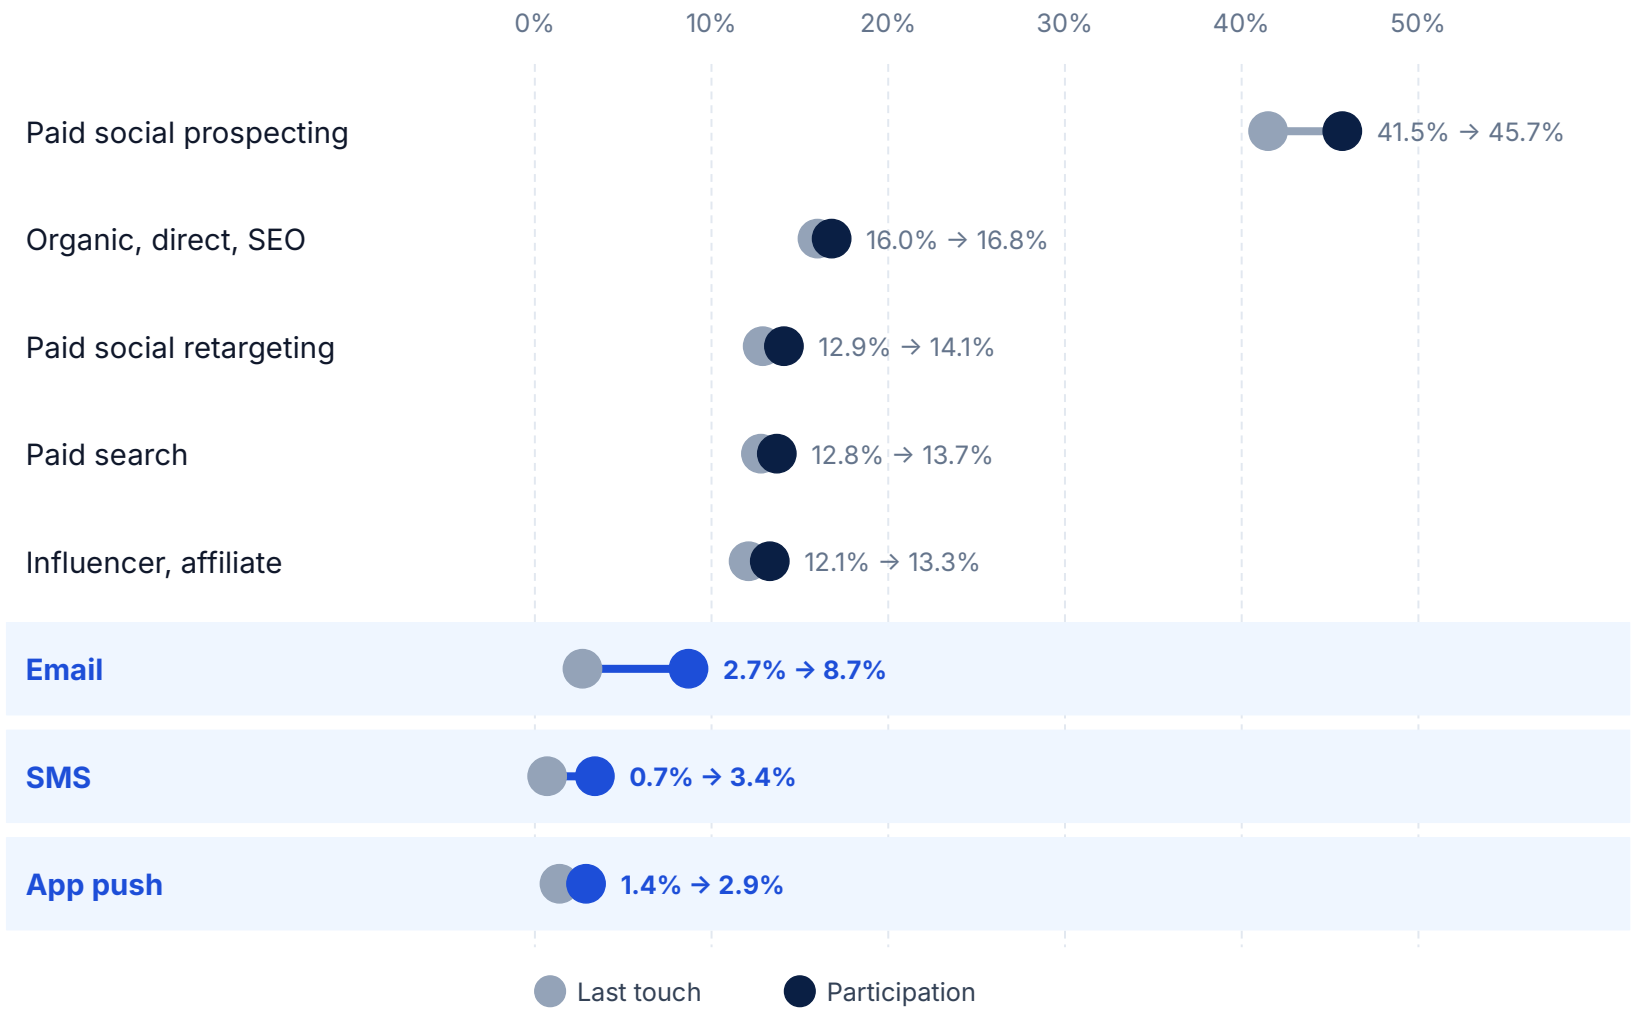

$62 → ~$57 **≈ −8%**

Converting one web-only buyer into an app user is worth about $115 of margin, almost two new-customer CACs

Source: case Exhibits H and J (45% contribution margin, $13.5M per 6 pts of repeat); strict CAC = $120M ÷ new customers; team estimates.

Last click undervalues owned channels about three times

Quince G27

4.8% → 15.0%

Owned channels: last-touch credit vs share of revenue they take part in

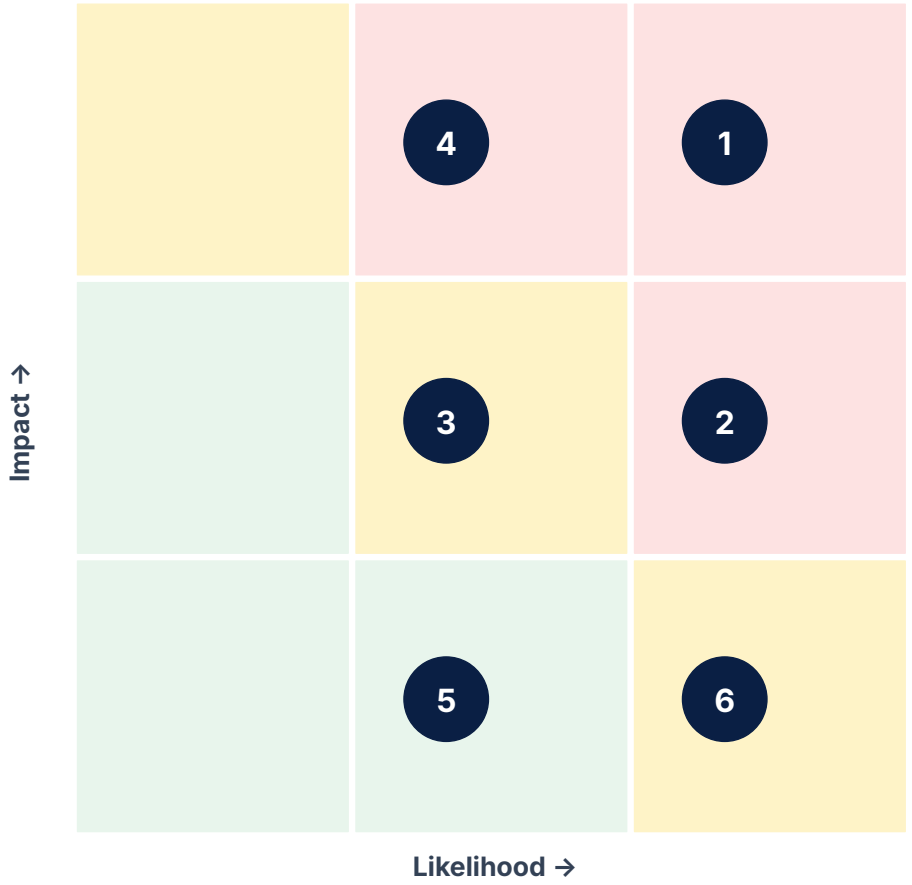

12.9% → 12.4%

Retargeting barely moves from last to first touch, so its cut rests on holdouts, not attribution

Source: Adobe CJA Attribution IQ, Order Revenue ($337,044), Marketing Channel, Person container, 90-day lookback, 1 Jan–30 Apr 2026.

Six risks, each with a mitigation and an early warning

Quince G27

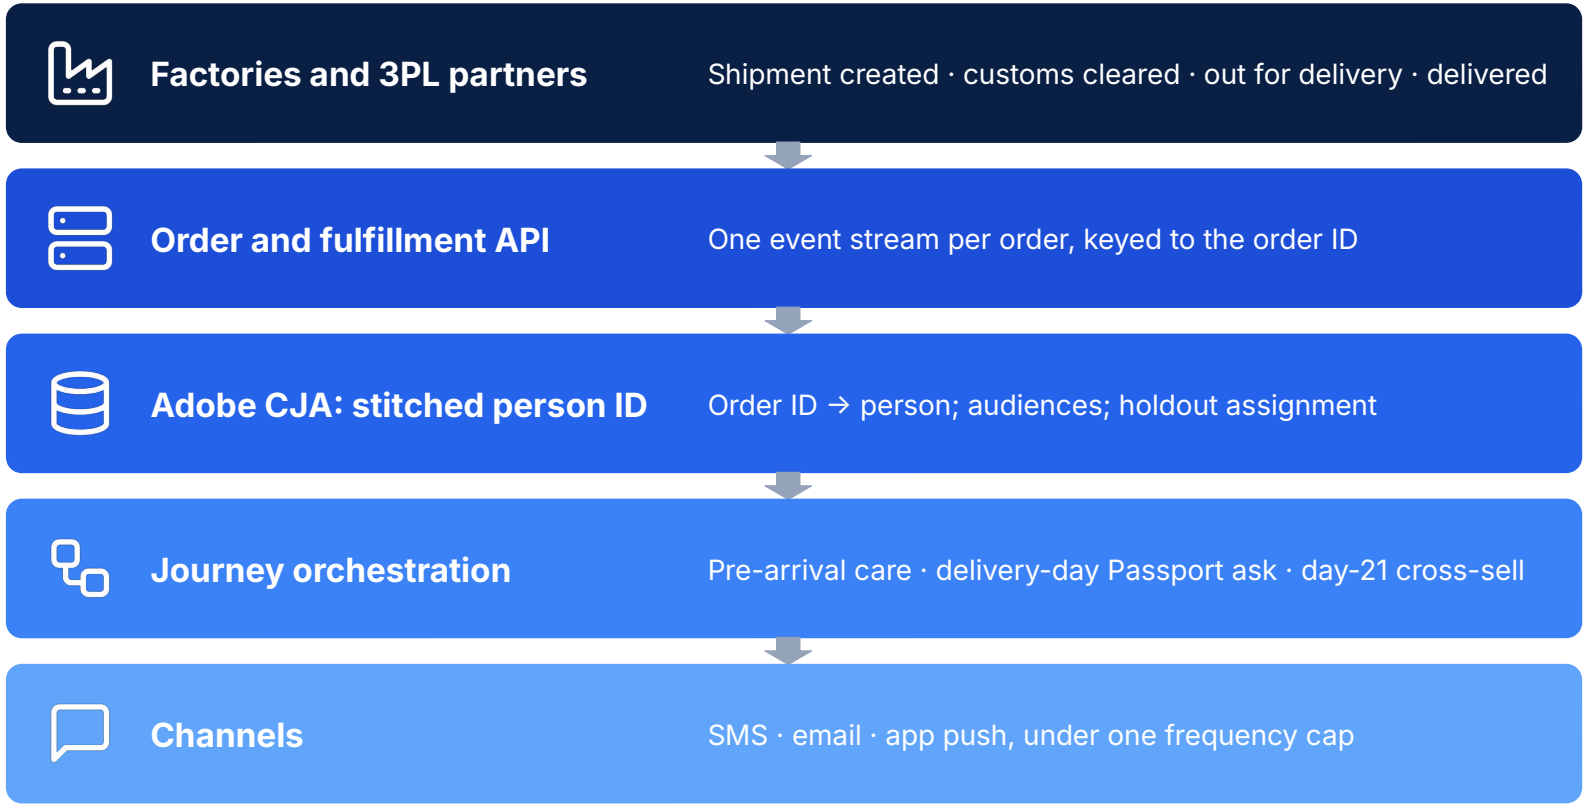

1. **Selection bias inflates lift**
   Randomized 10% holdout; A5 haircut built in
2. **Channel owners resist cuts**
   Scorecards move to incremental revenue
3. **Message fatigue, unsubscribes**
   Fewer, triggered sends; guardrail pauses tranche
4. **Consent and privacy (TCPA, CCPA)**
   Transactional and marketing consent split
5. **Fitting Room doesn't pay back**
   One-season test; stops if it loses to Passport
6. **Platform or signal shock**
   Owned share 5% → 11%; suppression by lists

Source: team analysis; case section 7 risk matrix. Positions are team judgment.

Material Journeys runs on shipping events Quince already has

Quince G27

If asked: "How hard is Material Journeys to actually build?"

Build sequence

1. **Weeks 1–4**
   Map shipping events; confirm consent split
2. **Weeks 5–8**
   Stream events into CJA; build audiences
3. **Weeks 9–12**
   Launch pre-arrival journeys in the South pilot

Low tech lift: the shipping events already exist; the work is routing them to CJA audiences and lifecycle triggers

Source: team architecture; Adobe CJA and Journey Optimizer as the activation layer (case Exhibit L). Timings are team estimates.

Sources: case data, our CJA project and public research

Quince G27

Case and Adobe CJA

Quince case packet, "Closing the Loop"
