Quince

Team G27

Own the Second Purchase

Turning viral first buyers into repeat customers with the same $120M

24% → 31%	−12 to −14%	$0
90-day repeat	blended CAC	new budget

Retargeting and lifecycle strategy · Grounded in Adobe Customer Journey Analytics

Case Competition World Cup · Graduate Track · October 2026

Win the second purchase: repeat to 31%, same budget

Quince G27

Move $9M of the fixed $120M from rented to owned channels to win the second purchase

Three levers: Capture every buyer (★ Passport) · Win the Golden Month (★ Material Journeys) · Never pay twice (★ Never Pay Twice Engine) · 0 discounts

3	**Rising rented-reach costs put the $10B valuation at risk** CAC +29% to $62; 60% of the budget is rented from three social platforms	**$62 CAC**
4	**Engagement after order one decides who buys twice** 77% of carts never order; engaged buyers repeat 28.1% vs 4.7%	**28.1% vs 4.7%**
5	**Rivals copy a discount in a day, not trust** Amazon wins paid retargeting; Shein bought Everlane, whose email was no moat	**1 day vs 9–12 mo**
6	**Data is ready; the lifecycle muscle must be built** Identity is ready in CJA; team, app and activation are funded inside the $120M	**$6.0M funded**
7	**Prove in 90 days, then scale by month nine** South pilot with a 10% holdout; fail Gate 1 and the money goes back	**$4M moves first**

24% → ~31%
90-day repeat (target ≥ 30%)

−12 to −14%
blended CAC (target −10%)

✓ No budget increase ✓ No price-led retention ✓ Grounded in Adobe CJA

Source: Adobe CJA, Quince Case Data View, Jan–Apr 2026; case Exhibits D, G, H, J, M; team estimates. Lever effects are gross before haircuts; the base case nets them to 31%.

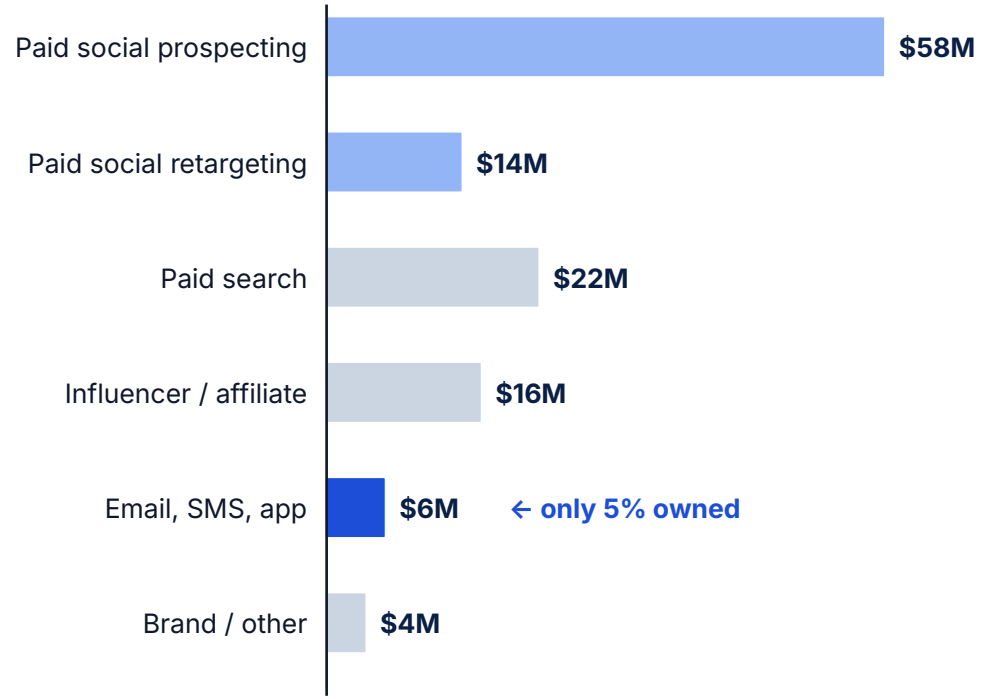

Rising rented-reach costs put the $10B valuation at risk

Quince G27

$62

blended CAC, up 29% in two years from $48

Fixed FY2026 paid marketing budget, $M (total $120M)

1 Signal loss hits retargeting first

iOS opt-in is ~35–50%; Safari and Firefox block cookies. Retargeting's $31 CAC also counts sales that would happen anyway.

2 Rising CAC threatens the valuation

The $10.1B valuation (Mar 2026) prices in a lifestyle ecosystem, not a dupe that rents every customer.

3 First-party data compounds

App-installed customers are worth $410 over three years vs $155 for web-only: 2.6×.

Quince rents 60% of its reach and spends just $1.43 per customer on the reach it owns

Source: case Exhibits D, G, H (illustrative); Reuters (Mar 2026, $10.1B valuation); Adjust and AppsFlyer ATT opt-in benchmarks.

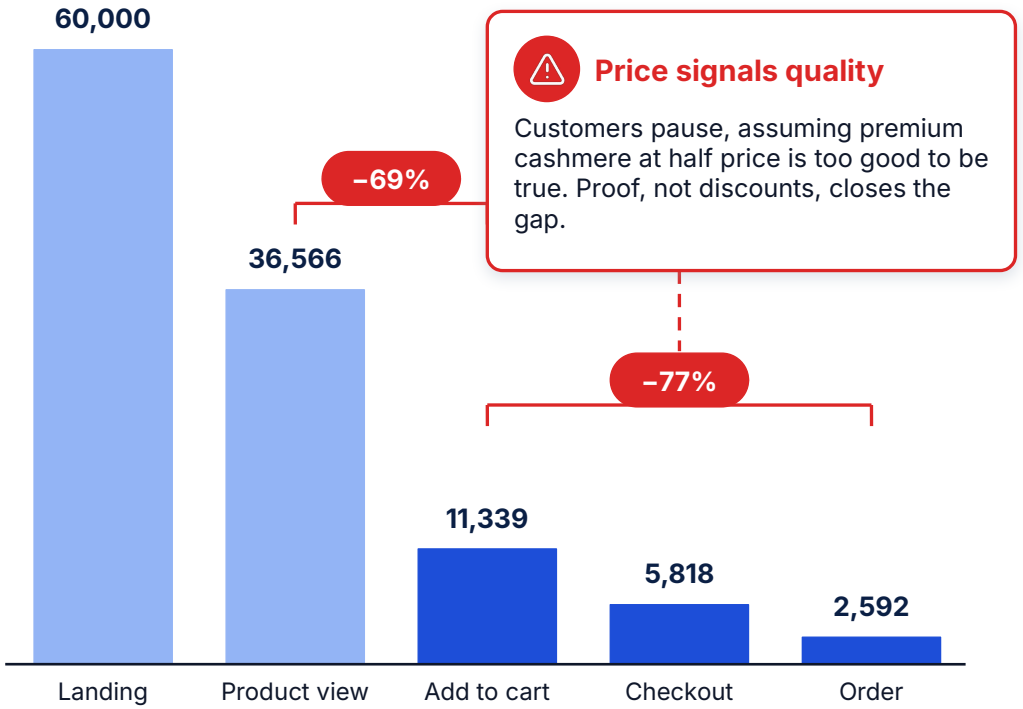

Engagement after order one decides who buys twice

Quince G27

28.1%

repeat for engaged buyers vs 4.7% for the rest

Where the funnel breaks: people at each step (CJA Fallout)

1 1 message follows 11,610 cart adds

Cart abandoners hear nothing, so recovery is new money (Flow, A4).

2 Week 2 is when buyers come back

5.6% of engaged buyers return in week 2 vs 2.1% of all buyers; half return in weeks 1–4 (Cohort).

3 The app keeps buyers: 21.5% repeat

App users after order one repeat 4.6× the 4.7% non-engaged baseline (segments A2, A5).

→ Target abandoners within hours, every buyer at delivery, engaged buyers in weeks 1–4

Source: Adobe CJA, Quince Case Data View, 1 Jan–30 Apr 2026, 60,000 people: Fallout, Flow, Cohort Table, segments A2/A5 (appendix 24–28). The price-signal mechanism is a hypothesis the pilot tests.

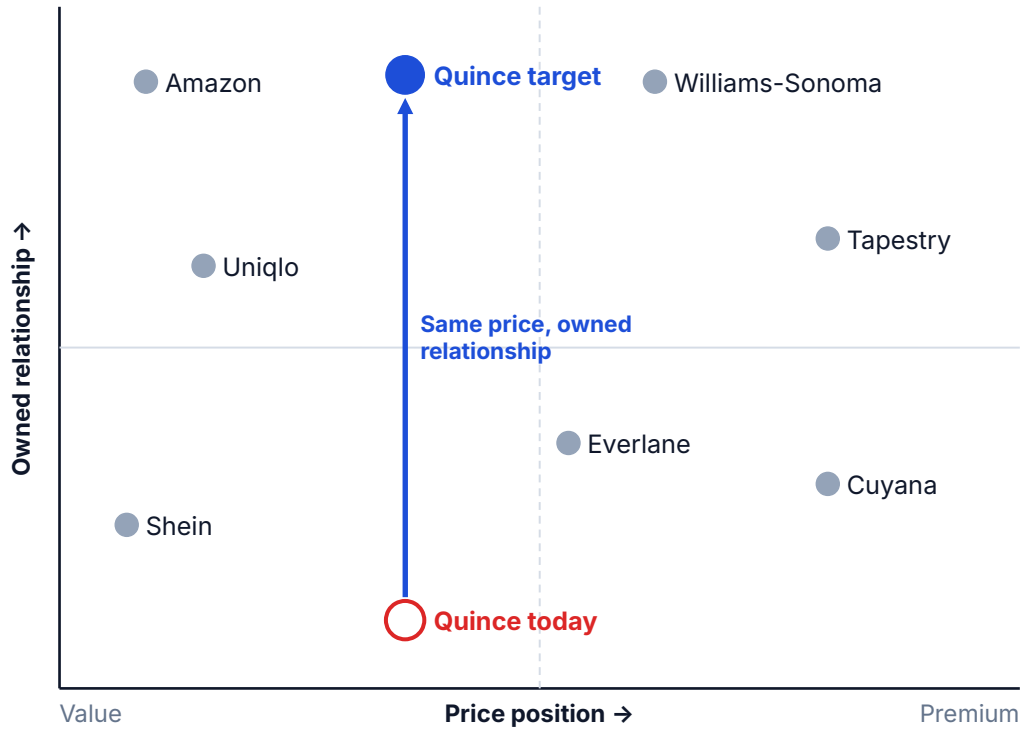

Rivals copy a discount in a day, not trust

Quince G27

1 day vs 9–12 mo

to copy a 20% discount vs a 12-month lifecycle program

Price vs depth of owned relationship (team judgment)

1 Value price, rented relationship

Quince prices with Uniqlo and Shein but owns less of its customer than Williams-Sonoma or Tapestry. Amazon wins any paid-retargeting war.

2 Tactics copy in a quarter

Everlane's mature email program was no moat; Shein bought it in May 2026. A consented base plus M2C cost takes years.

3 If rivals escalate, hold price

If rivals discount or bid up audiences, Quince answers with proof and access, with owned share already 5% → 11%.

Quince's moat is M2C cost plus a known, consented, reachable customer base

Source: case Exhibit M; press on Shein's purchase of Everlane (May 2026); map positions and time-to-copy are team judgment.

Data is ready; the lifecycle muscle must be built

Quince G27

$6.0M

funds every gap, inside the $7.5M owned-channel build

From batch-and-blast to logistics-integrated retention pods

Global factory and fulfillment APIs

Six branches cover both targets; each program fits one

Quince G27

QUESTION	TARGET AND ITS ARITHMETIC	BRANCHES (MECE)	TODAY → WHAT MOVES IT
How does Quince lift 90-day repeat by 6+ pts and cut blended CAC by 10%+ on a fixed $120M, without discounts?	**Raise 90-day repeat, 24% → ≥ 30%** Repeat = engaged share × engaged repeat + non-engaged share × non-engaged repeat	**A1** Grow the share of buyers we can reach	24.5% engage after order one (A2) **L1 · Quince Passport, Track It in the App, The Fitting Room**
		A2 Lift repeat among engaged buyers	28.1% repeat; week-2 return peaks at 5.6% **L2 · Material Journeys, Care Calendar, Gift Ledger, Quince Insider, Beauty Refill, Cashmere Second Life**
		A3 Lift repeat among buyers we can't reach	4.7% repeat (A2) **Customer-match ads; one triggered day-30 free exchange, never a discount**
	Cut blended CAC, $62 → ≤ $56 CAC = $120M ÷ new customers; effective CAC also falls as repeat rises (Exhibit J)	**B1** Stop paying for customers Quince already has	Retargeted buyers repeat 23.0% vs 23.4% organic (A3b) **L3 · Never Pay Twice Engine (T1); branded-search holdout (T2)**
		B2 Win more new customers per dollar	77% of cart adders never order (A1) **L1 · Saved Cart, Restock-First Waitlist · L3 · Proof Creators, Loyalist Lookalikes**
		B3 Spread the same spend over more buyers	+6 pts repeat ≈ −10 to −12% (Exhibit J) **Follows from the repeat branches: +7 pts → −12 to −14%**

Every program sits on exactly one branch, and no branch is left without a move

Source: case section 3 (targets), Exhibits D, G, J; Adobe CJA A1, A2, A3b, Cohort Table. Repeat and CAC identities are exact; each program is listed once, on the branch it moves most.

One CJA loop runs every lever, every week

Quince G27

1 Diagnose

Option C

Read Fallout, Flow, Cohort Table and Attribution IQ on one stitched person ID

OWNER **Head of Analytics**
RHYTHM Weekly

2 Target

Options A + B

Turn findings into saved CJA segments: abandoners, engaged, cashmere-first, recent buyers

OWNER **Analytics + CRM**
RHYTHM Weekly

3 Activate

Options A + B

Send segments to lifecycle journeys and to paid-media suppression lists

OWNER **Marketing ops**
RHYTHM Daily sync

4 Prove

Option C

Read every move against a randomized holdout: 10% in the South pilot

OWNER **Head of Analytics**
RHYTHM Weekly council

5 Reallocate

Option C

Release the next tranche only if the gate passes; failed money goes back

OWNER **CMO + CFO**
RHYTHM Gates M3, M9; quarterly

What CJA proves sets the next diagnosis and the next tranche

Why it matters: Option C alone takes 6–12 months to trust. Running it as a weekly loop from day 1 lets Options A and B move money within weeks, with C deciding every tranche.

Growth and analytics share one workspace, one holdout and one decision rule

Source: team strategy (CJA operating loop, Strategy Workbook v2); case section 4 (Options A, B, C), Exhibits I and L.

Each option covers another's weakness, so we blend them

Quince G27

OPTION ALONE	WHAT IT GETS RIGHT	WHY IT FAILS ALONE (EXHIBIT K)	ITS JOB IN OUR BLEND
B **Paid precision and suppression**	✓ Results in weeks at $0 incremental (Exhibit I)	✕ High signal-loss exposure; builds no lasting relationship	**Funds it: suppression frees $4M in months 1–3**
A **Owned lifecycle precision**	✓ Lowest cost per touch; insulated from ATT	✕ Reach capped by today's list: 1 in 4 buyers engaged	**Builds it: capture grows the list; journeys earn order two**
C **Attribution-based reallocation**	✓ The lasting decision framework	✕ 6–12 months to trust; high execution and change risk	**Proves it: runs from day 1 and decides every tranche**

→ **B's speed pays for A's build; A's owned reach cuts B's signal-loss risk; C's holdouts de-risk both**

Source: case section 4 (Options A, B, C), Exhibit I (cost, timing), Exhibit K (risk matrix); team analysis.

Seven moments decide whether a first buyer returns

Quince G27

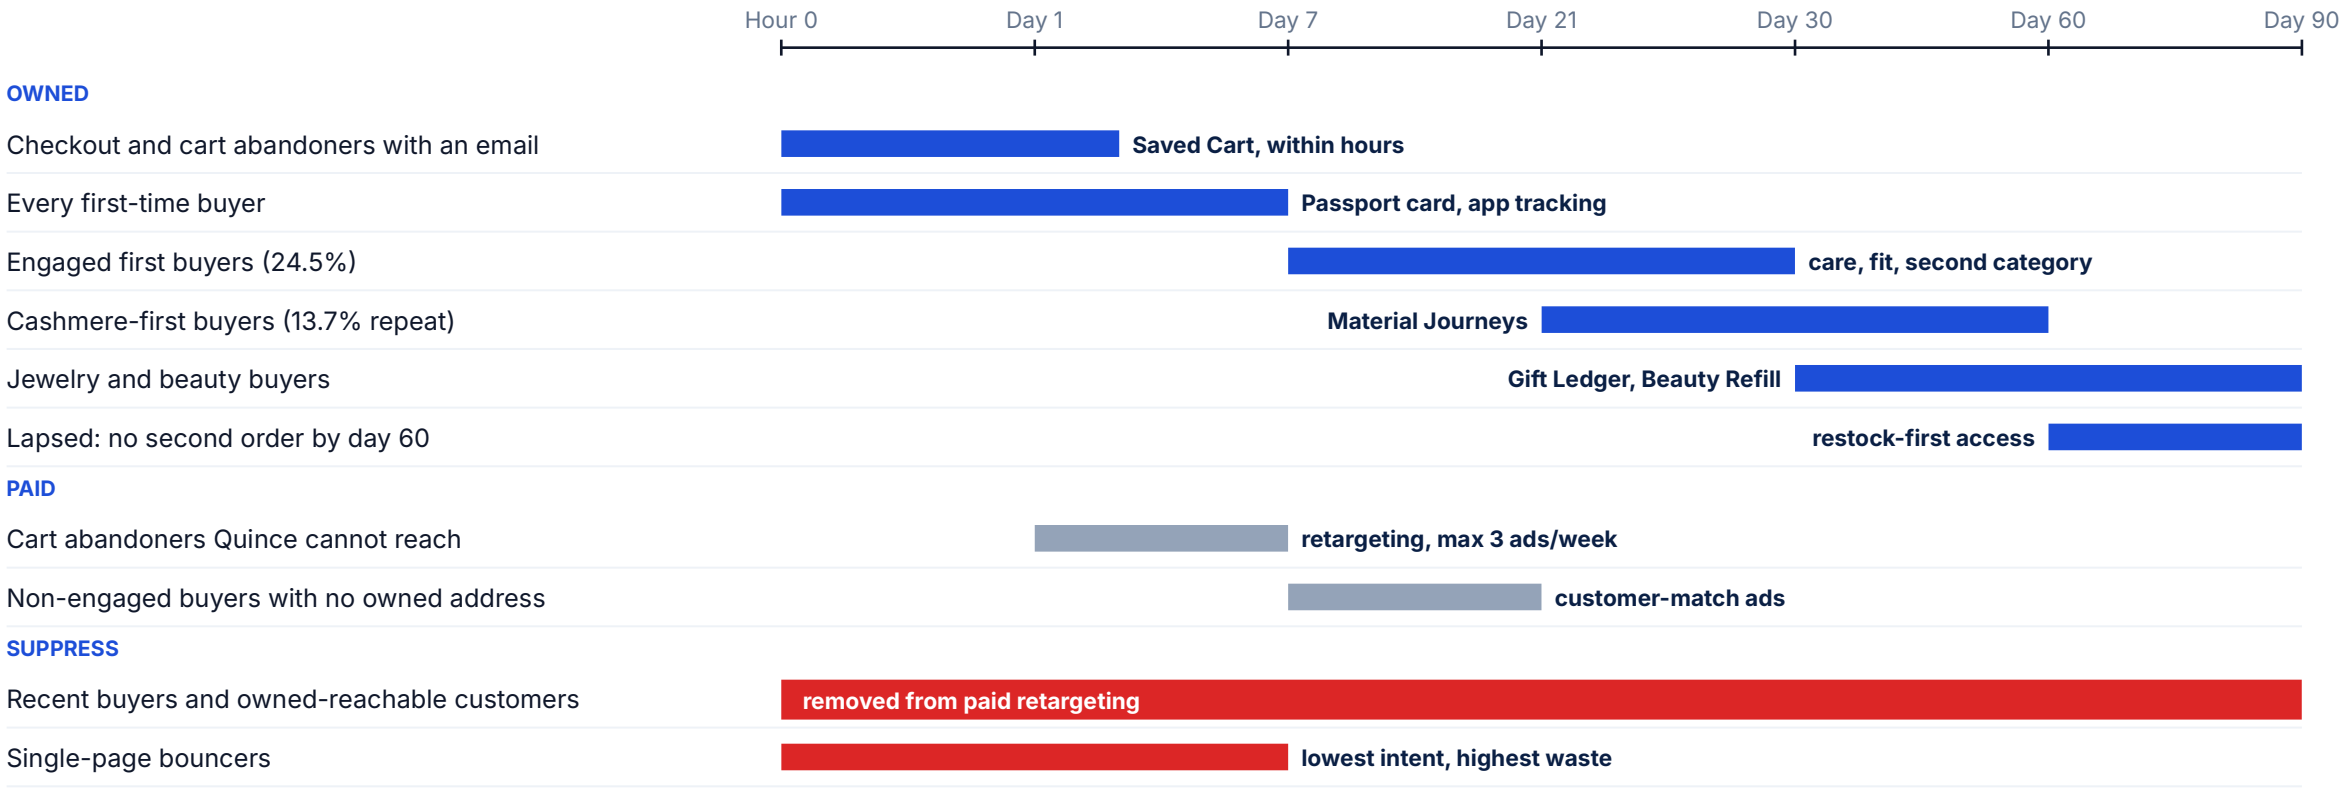

Discovery	Product page	Cart	Checkout	Delivery	Days 0–30	Days 30–90
HYPOTHESIS	MEASURED	MEASURED	MEASURED	HYPOTHESIS	MEASURED	MEASURED
45.5% of buyers arrive via prospecting	**25,227** leave without a cart add	**77%** of cart adders never order	**27.1%** app cart → order vs 22.7% web	**24.5%** of buyers engage after order one	**5.6%** week-2 return, engaged buyers	**13.7%** repeat for cashmere buyers
MECHANISM: Price signals quality	MECHANISM: Perceived risk	MECHANISM: Unfinished tasks fade	MECHANISM: Default effect	MECHANISM: Peak-end, endowment	MECHANISM: Habit formation	MECHANISM: Mental accounting
PROGRAMS (2): Proof Creators; Loyalist Lookalikes	PROGRAMS (2): The Fitting Room; Restock-First Waitlist	PROGRAMS (1): Saved Cart	PROGRAMS (1): Track It in the App	PROGRAMS (1): Quince Passport	PROGRAMS (3): Care Calendar; Quince Insider; Never Pay Twice Engine	PROGRAMS (4): Material Journeys; Gift Ledger; Beauty Refill; Cashmere Second Life

All 14 programs sit at exactly one moment, and every moment has at least one program

Source: Adobe CJA A1, A2, A4, A5, A6 and Cohort Table; behavioural mechanisms are hypotheses the pilot tests.

Owned channels first; paid only where owned can't reach

Quince G27

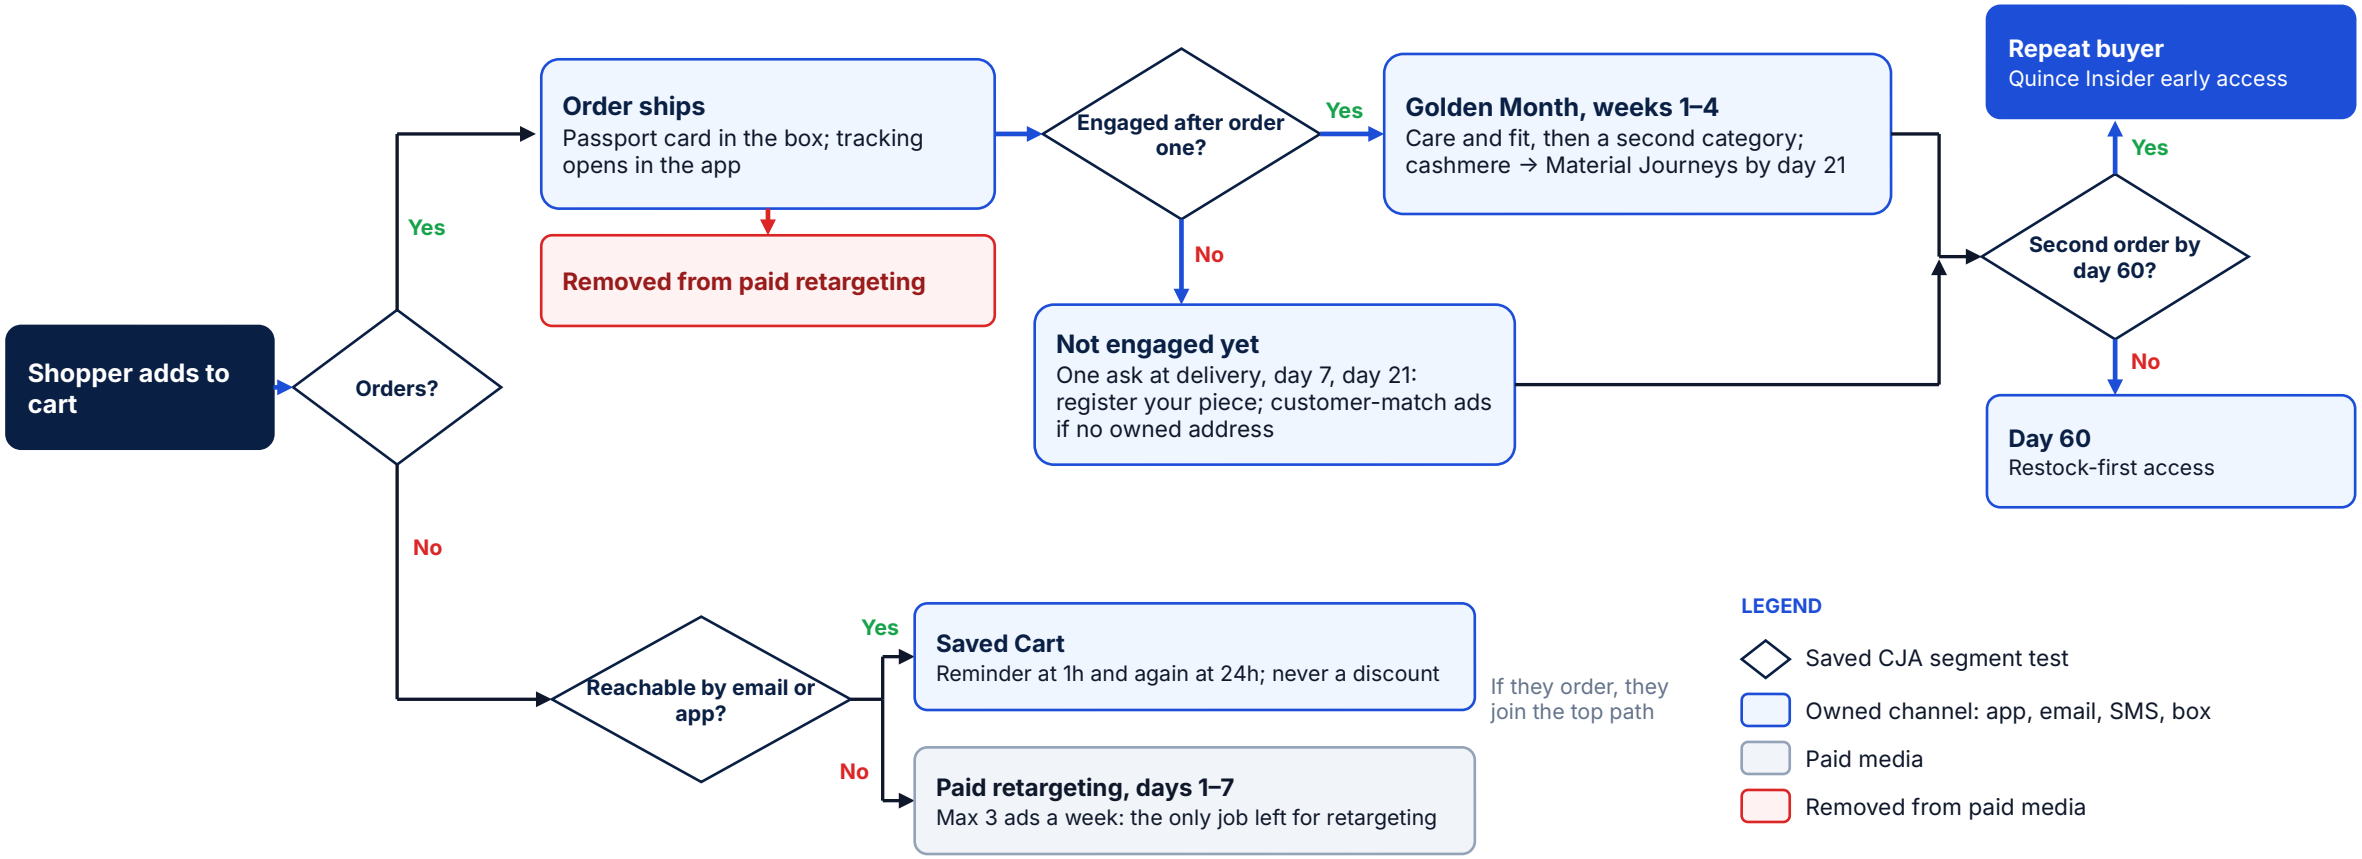

Paid retargeting keeps one job: reaching high-intent people Quince has no other way to contact

Source: Adobe CJA segments (A1, A2, A4, A6, Cohort Table); team targeting plan. Each row is a saved CJA segment that drives both the message and the measurement. Time axis is not to scale.

Every shopper follows exactly one path, owned first

Quince G27

Each diamond is a saved CJA segment, so one rule drives both the message and its measurement

Source: Adobe CJA segments (A1, A2, A4, A6, Cohort Table); team targeting plan; timings from the strategy's segment matrix.

Fourteen programs, three flagships, zero discounts

Quince G27

1 Capture every buyer

★ Quince Passport
Box card: register your piece. Endowment, peak-end
KPI: Registrations per 100 boxes

Track It in the App
Tracking opens in the app by default
KPI: App installs per 100 orders

Saved Cart
Reminder within hours, no discount
KPI: Cart → order vs holdout

Restock-First Waitlist
"Text me when it's back", real sell-outs
KPI: Sign-ups → first orders

The Fitting Room
Members-only pop-up, entry via the app
KPI: App installs per visitor

2 Win the Golden Month

★ Material Journeys
Cashmere buyer → throw or linen. Mental accounting
KPI: 2nd-category rate, 60 days

Care Calendar
Seasonal care keeps knitwear buyers close
KPI: Monthly active app users

Gift Ledger
Saved dates trigger picks 14 days before
KPI: Gift orders per saved date

Quince Insider
Early access earned by engagement, not spend
KPI: Insider repeat vs others

Beauty Refill
Reminders timed to each product's use cycle
KPI: Refills per beauty buyer

Cashmere Second Life
Take-back rewarded with early access
KPI: Next order within 60 days

3 Never pay twice

★ Never Pay Twice Engine
Daily CJA suppression of own buyers in paid ads
KPI: Incremental orders per $

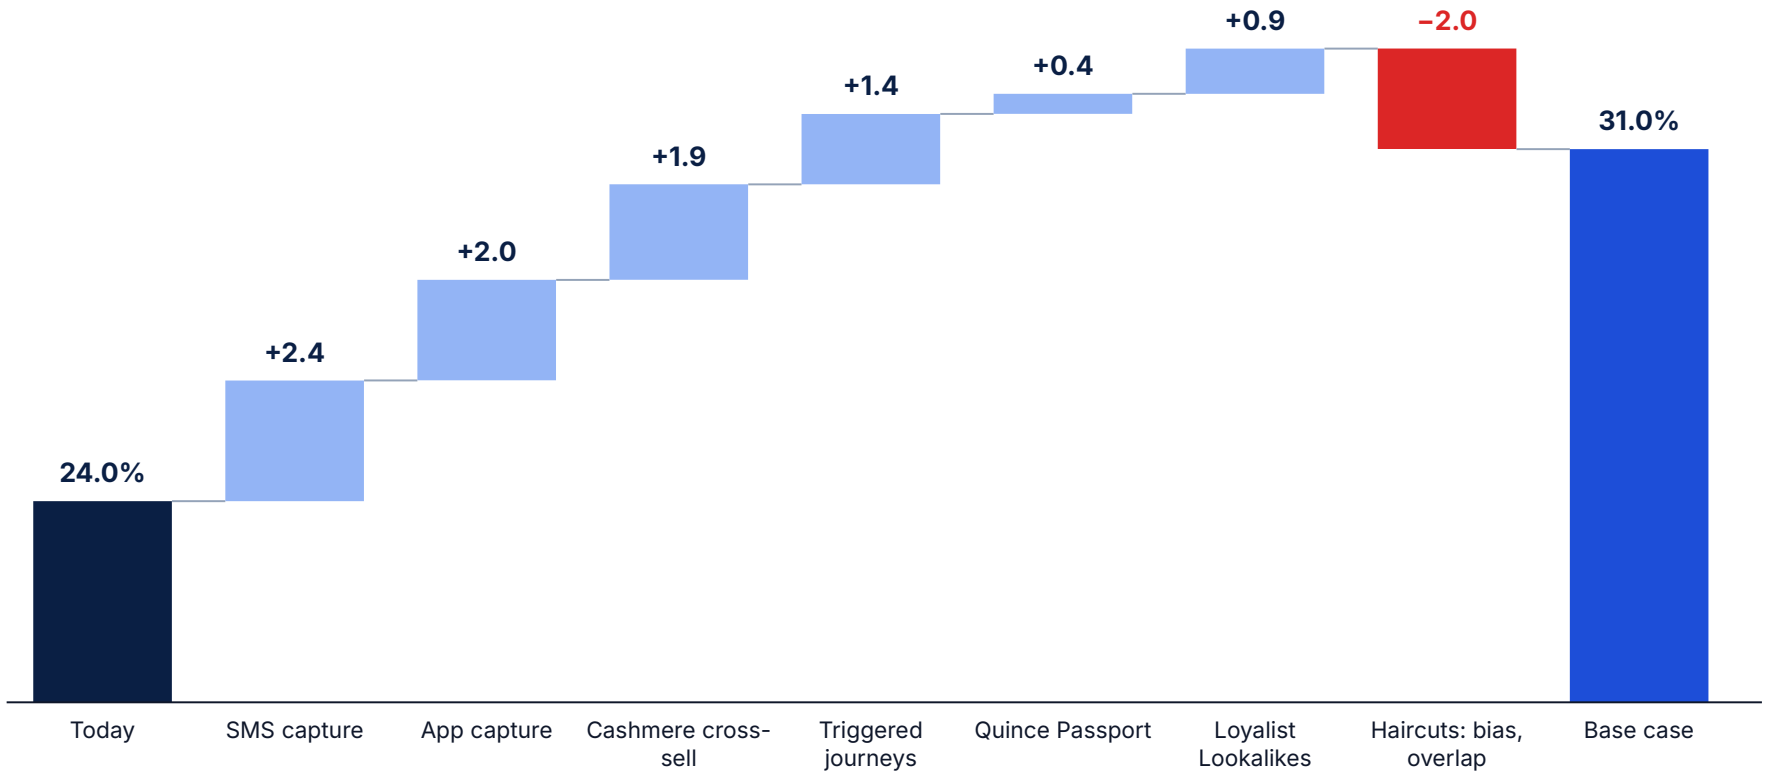

Loyalist Lookalikes
Half of prospecting seeded on repeat buyers
KPI: 90-day revenue per $

Proof Creators
Wear-tests and fabric close-ups, $1.5M from search
KPI: Product view → cart

Source: team strategy. Each program sits in one lever, works on one named behaviour and has a KPI CJA can read.

Six drivers lift 90-day repeat from 24% to 31%

Quince G27

Axis starts at 20%

SCENARIOS

Gross plan no haircuts	**33.0%**
Base case measured haircuts, 15% overlap	**31.0%**
Downside 50% haircut on everything	**29.5%**
Downside + buffers perks and beauty at 50%	**30.0%**

Even the downside with buffers reaches the 30% target; Gate 2 checks 28% at month 9

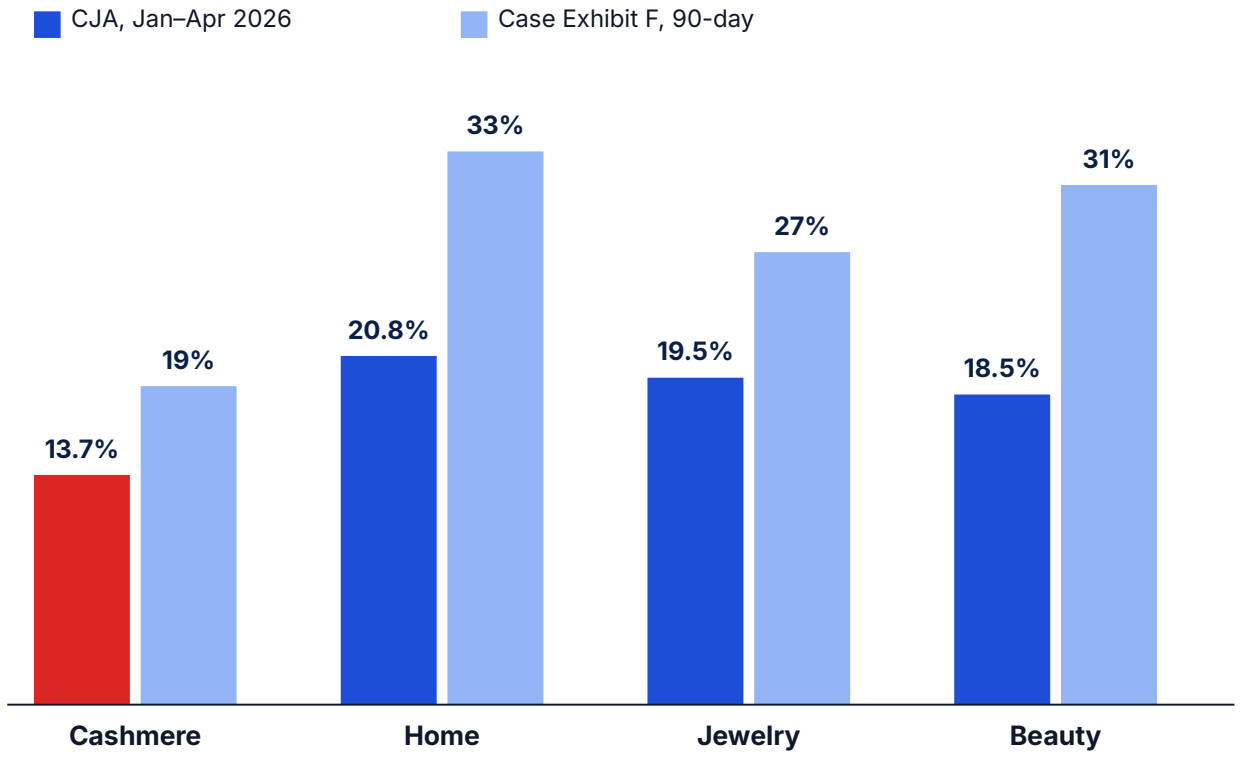

Source: case Exhibits E and J (baseline 24%); Adobe CJA A2/A5 measured haircuts (app 17%, SMS 37%); new-lever sizes are team estimates.

Cashmere brings buyers in; other categories bring them back

Quince G27

Repeat rate by category, %

Both sources rank cashmere last

1 Cashmere is the biggest door

It touches 40.7% of CJA buyers (38% of new customers in the case) but repeats least: 13.7%.

2 Home keeps buyers longest

20.8% repeat in CJA, 33% in the case: higher baskets and a natural cross-sell from knitwear.

3 Jewelry and beauty are sticky

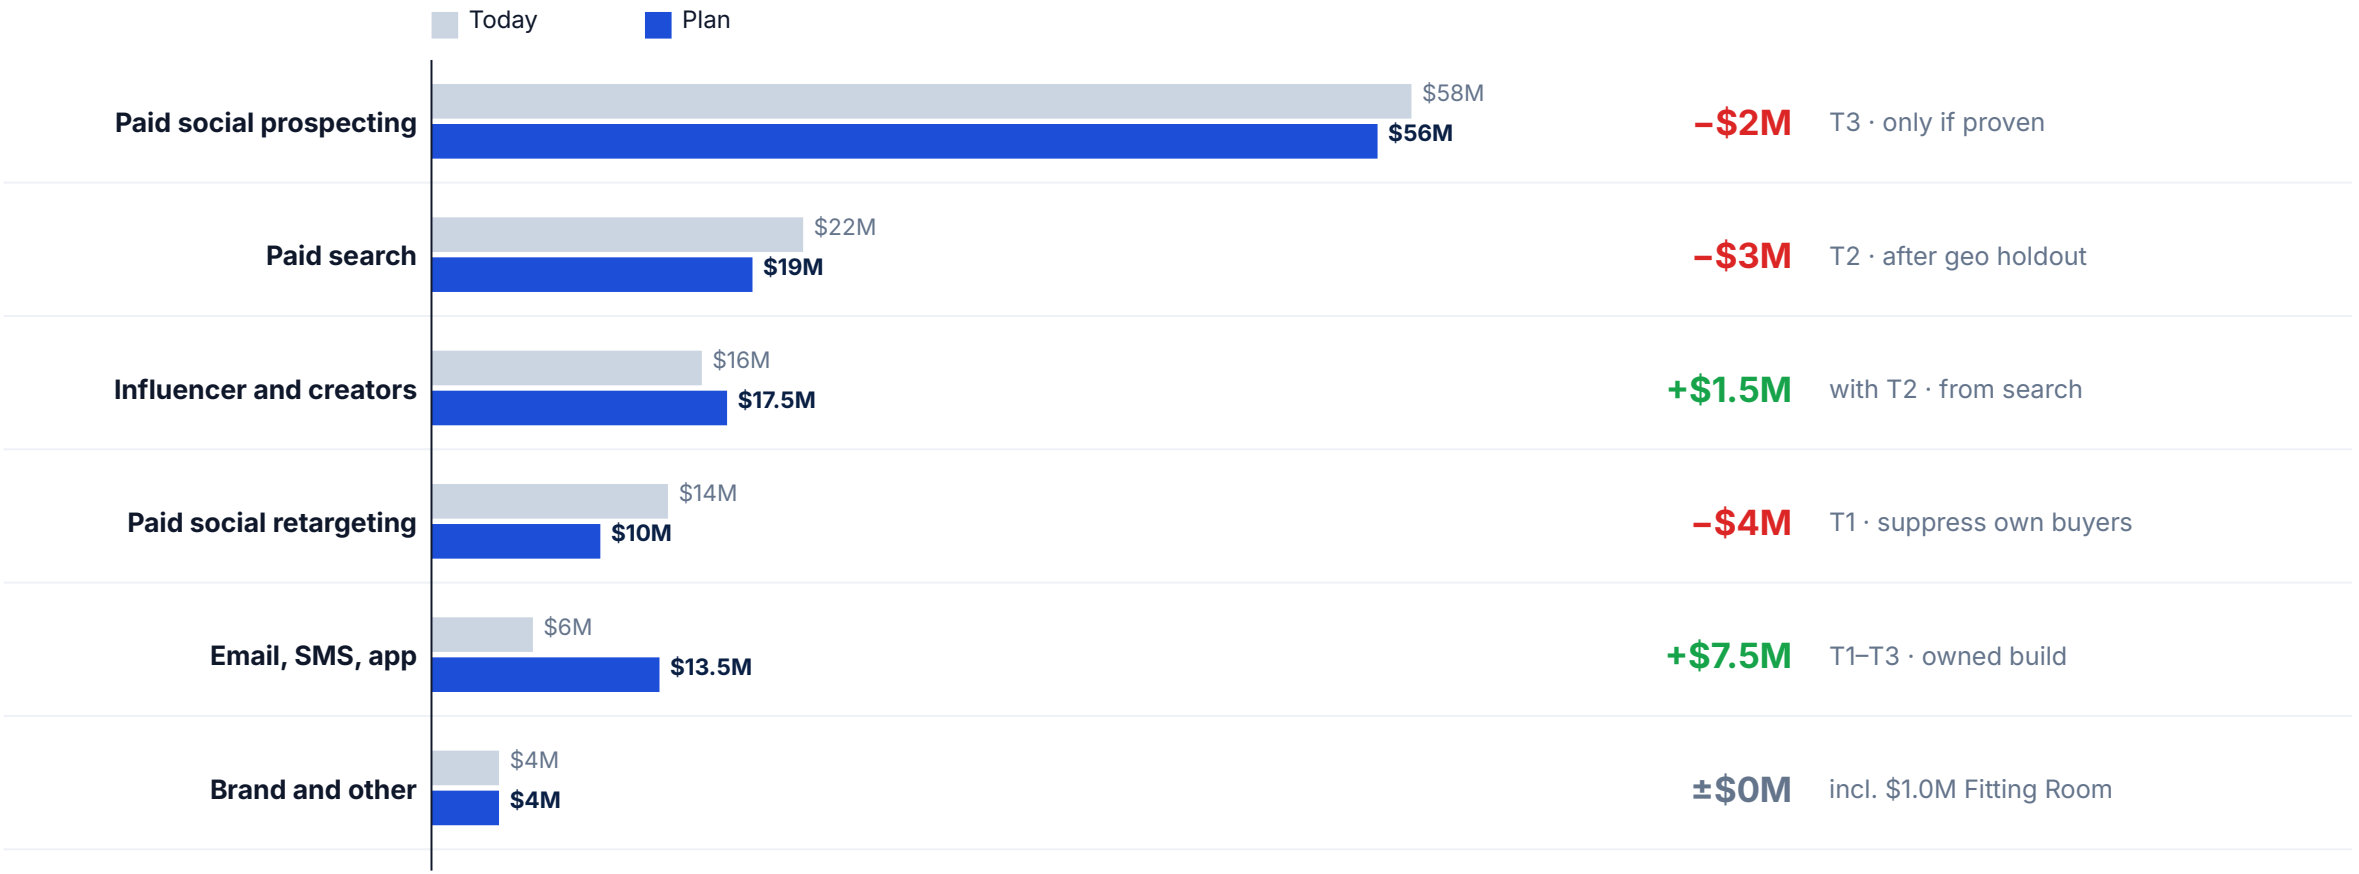

Gifting and replenishment drive returns: the Gift Ledger and Beauty Refill target them.

→ Route cashmere buyers to a second category, never a second sweater: that is Material Journeys

Source: Adobe CJA A6 (repeat on a ~3-month window, so lower than the case); case Exhibit F (90-day repeat, illustrative).

$9M moves inside $120M; owned share 5% → 11%

Quince G27

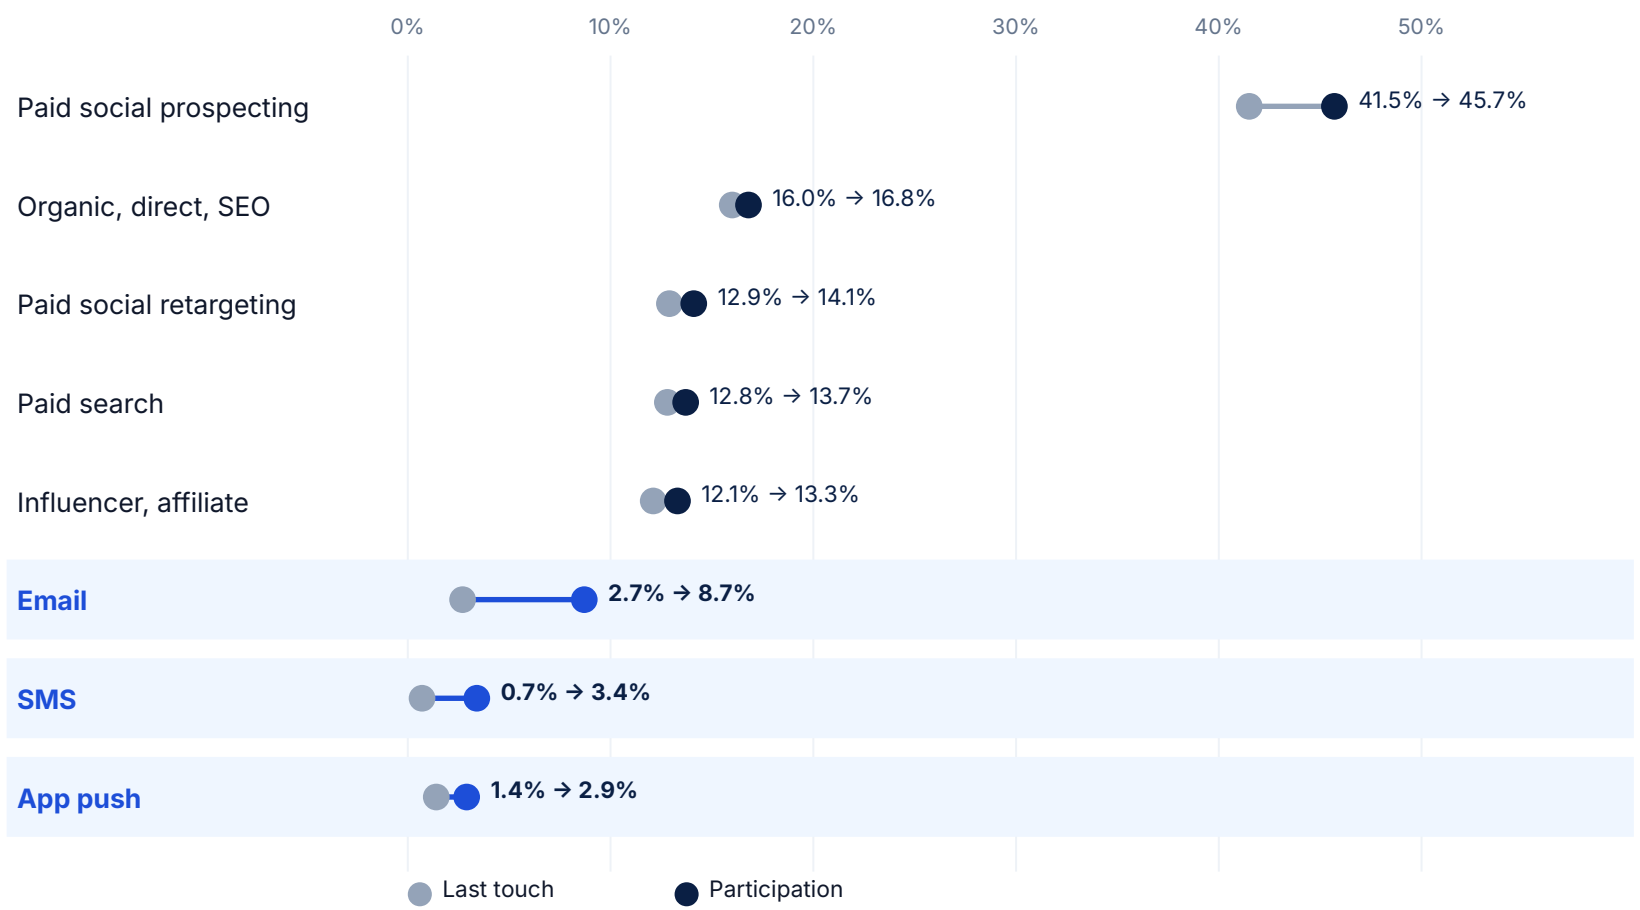

Paid social prospecting	−$2M	T3 · only if proven
Paid search	−$3M	T2 · after geo holdout
Influencer and creators	+$1.5M	with T2 · from search
Paid social retargeting	−$4M	T1 · suppress own buyers
Email, SMS, app	+$7.5M	T1–T3 · owned build
Brand and other	±$0M	incl. $1.0M Fitting Room

Cuts start with the least incremental spend; prospecting moves only if a holdout proves over-credit

Source: case Exhibit G (today); team plan, tranches T1–T3 gated by CJA holdouts. Brand/other keeps $4M, of which $1.0M funds the Fitting Room test.

Last click undervalues owned channels about three times

Quince G27

OWNED CHANNELS

4.8% → 15.0%

share of revenue: last-touch credit vs revenue they take part in

PAID SOCIAL RETARGETING

12.9% → 12.4%

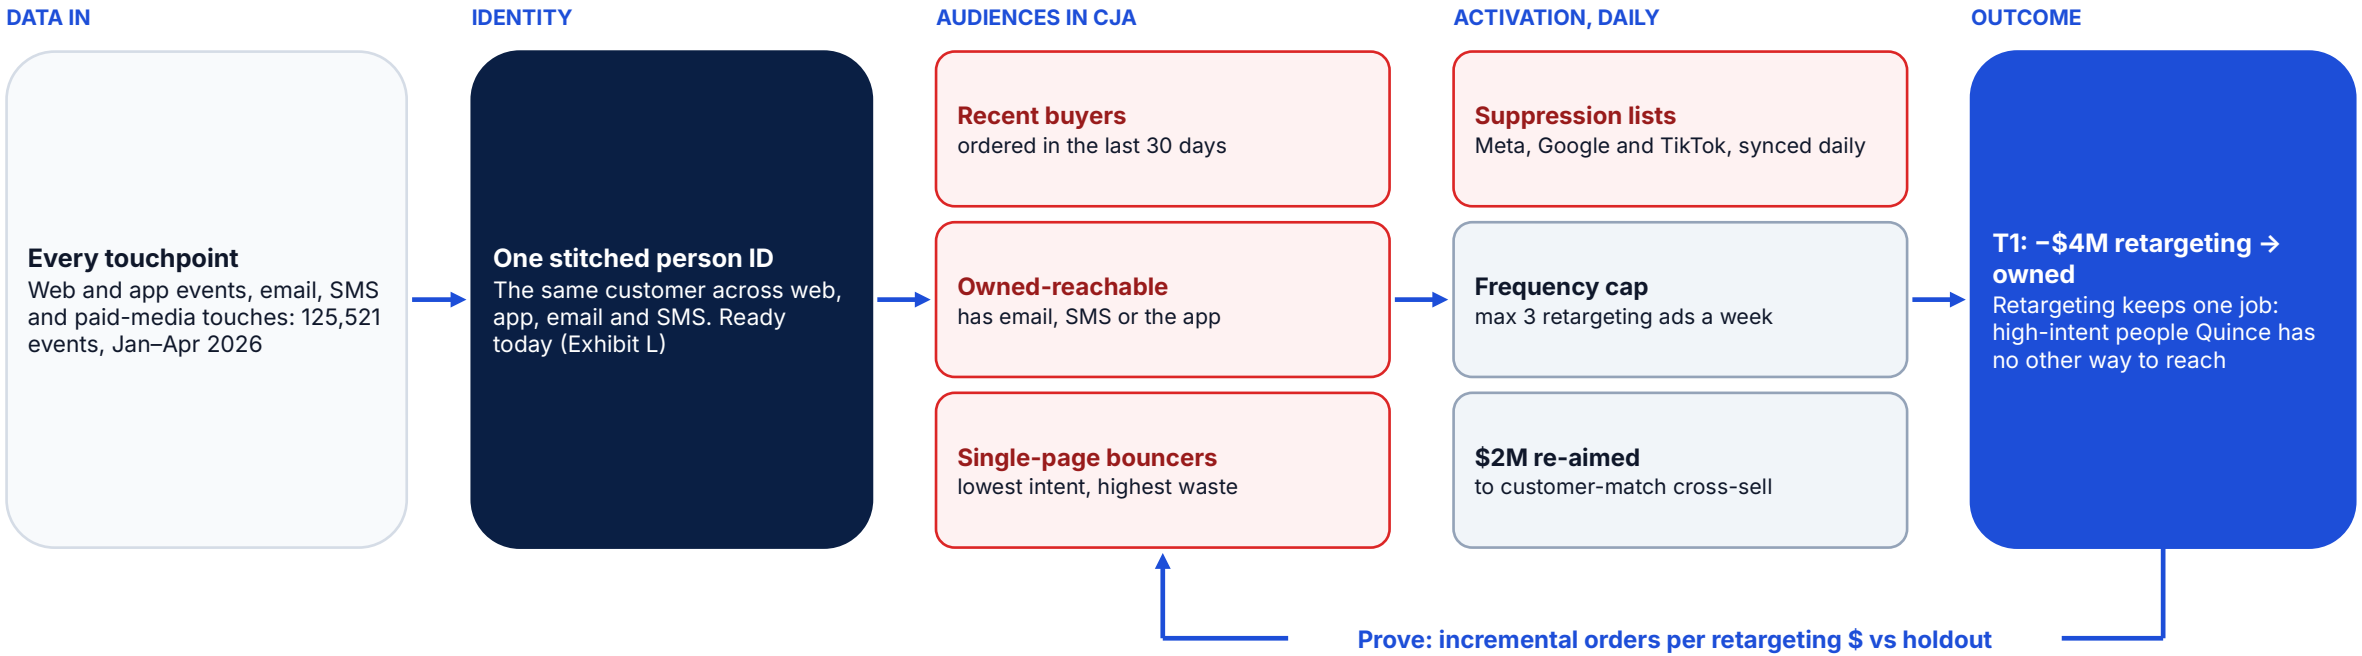

last touch vs first touch: attribution neither convicts nor clears it

Retargeting barely moves across models, so its cut rests on holdouts, not on attribution

Source: Adobe CJA Attribution IQ, Order Revenue ($337,044), Marketing Channel, Person container, 90-day lookback, 1 Jan–30 Apr 2026.

Never Pay Twice: stop buying customers Quince already has

Quince G27

Why it is safe: retargeted buyers repeat at 23.0% vs 23.4% organic (A3b), so suppression removes spend on people who return anyway; prospecting, which brings 45.5% of buyers, is untouched.

Tranche 1 frees $4M in months 1–3 without touching prospecting

Source: team strategy; case Exhibits G, I, L; Adobe CJA A0 (125,521 events) and A3b.

The same $120M earns ~$25M more contribution yearly

Quince G27

Contribution added per year, $M

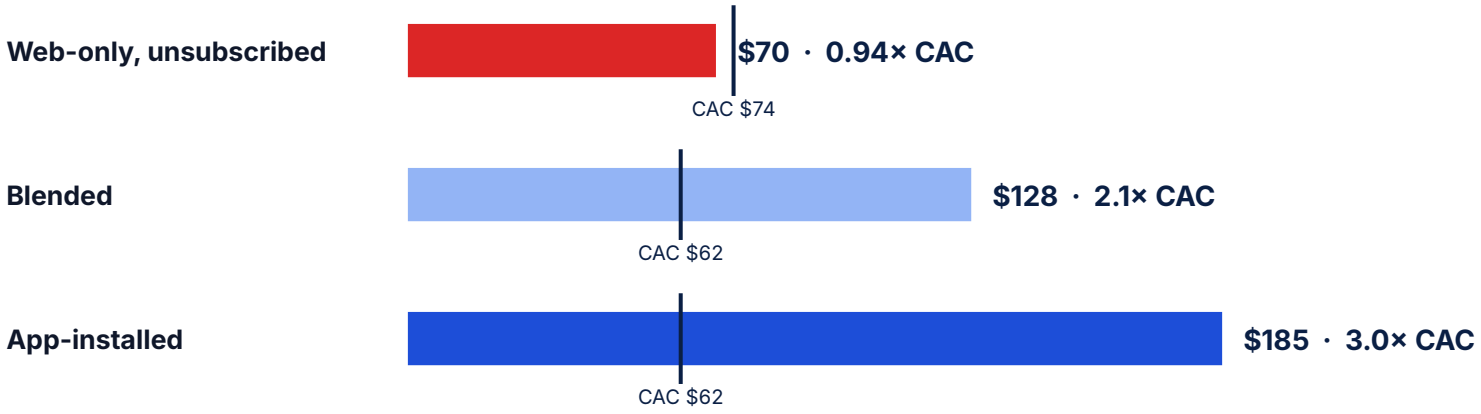

Repeat at +7 pts, plus ~170K extra new customers at strict CAC −8%

≈ $25M

3-year margin per customer vs CAC, $

3-year LTV × 45% margin; web-only vs prospecting CAC $74, others vs $62

BLENDED CAC, MEASURED TWO WAYS

Effective CAC (case Exhibit J measure)

$62 → ~$54

−12% to −14%: same spend, more purchasing customers

Strict new-customer CAC ($120M ÷ new customers)

$62 → ~$57

≈ −8%: cart recovery and product-page proof add new customers at the same spend

Turning one web-only buyer into an app user is worth ~$115 of margin, almost two CACs

Source: case Exhibits H and J (45% contribution margin, $13.5M per 6 pts of repeat); strict CAC = $120M ÷ new customers; team estimates.

Six risks, each with a mitigation and early warning

Quince G27

RISK	LIKELIHOOD	IMPACT	MITIGATION	EARLY WARNING IN CJA
Selection bias: loyal people opt in anyway	Medium	High	Measured haircut (A5) built into every number; randomized 10% holdout	**Pilot vs holdout gap, 30-day repeat**
Channel owners resist losing budget	High	Medium	Scorecards move from platform ROAS to CJA-measured incremental revenue	**Tranche release dates vs plan**
Message fatigue and unsubscribes	Medium	Medium	Triggered messages replace batch sends under one frequency cap	**Unsubscribes per 1,000 sends; breach pauses tranche**
Consent and privacy (TCPA, CCPA)	Low	High	Delivery and marketing consent split; marketing box never pre-ticked	**Consent audit pass rate; complaints**
Fitting Room doesn't pay back	Medium	Low	Capped at $1.0M in the brand line; one metro, one season	**App installs per visitor vs Passport**
Platform or signal shock (Meta, TikTok)	High	Medium	The plan itself: owned share 5% → 11%; engaged buyers 1 in 4 → 1 in 2	**Share of orders from owned channels**

Source: team analysis; case section 7 and Exhibit K. Likelihood and impact are team judgment.

Engaged buyers (inclusion segment)

Engaged buyers return 2.7× more in week 2 (5.6% vs 2.1%) and half return in weeks 1–4, so the first month is when to act

Source: Adobe CJA, Cohort Table, inclusion and return Orders ≥ 1, weekly, 1 Jan–30 Apr 2026.

Flow: almost no message follows an abandoned cart

Quince G27

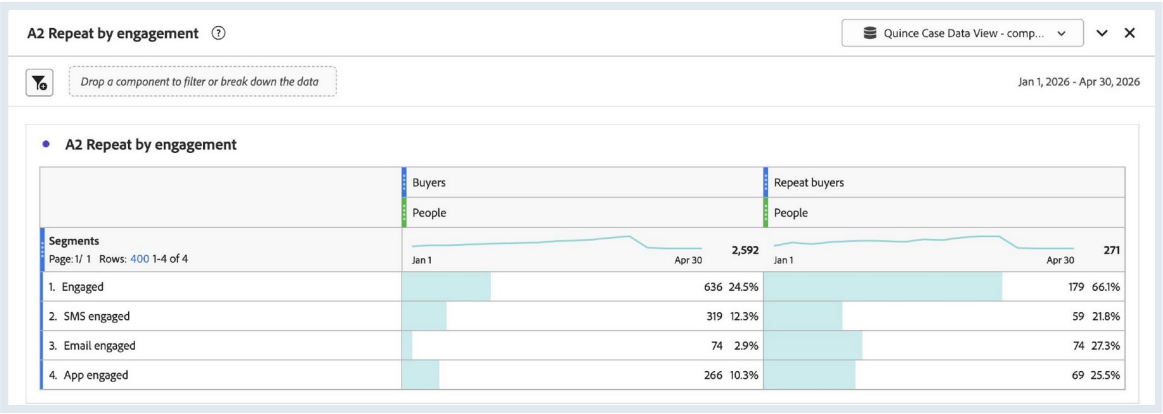

Only 1 of 11,610 cart adds is followed by an email, so a basic cart-recovery journey is the fastest win

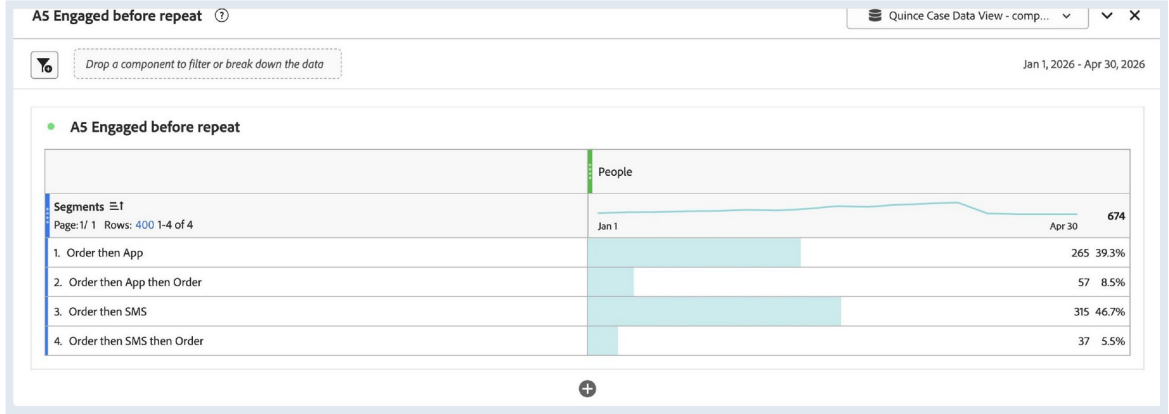

Source: Adobe CJA, Flow from add_to_cart, Person container, 1 Jan–30 Apr 2026.

Segments: engagement after order one drives repeat

Quince G27

Repeat by engagement (A2)

Engaged after order one (A5)

Engaged buyers are 24.5% of buyers but 66% of repeaters, so engaging more buyers after order one beats buying more traffic

Source: Adobe CJA, freeform tables with engagement segments and sequential segments, 1 Jan–30 Apr 2026.
