Quince

Team G27

Own the Second Purchase

Turning viral first buyers into repeat customers with the same $120M

24% → 31%	−12 to −14%	$0
90-day repeat	blended CAC	new budget

Retargeting and lifecycle strategy · Grounded in Adobe Customer Journey Analytics

Case Competition World Cup · Graduate Track · October 2026

14 programs win the second purchase at $0 new budget

Quince G27

Move $9M of the fixed $120M from rented to owned reach; earn the second purchase when trust peaks

1 Capture every buyer

Turn every order into a relationship

- ★ **Quince Passport**
- Track It in the App
- Saved Cart
- Restock-First Waitlist

+4.8 pts repeat

2 Win the Golden Month

Earn the second order in weeks 1–4

- ★ **Material Journeys**
- Care Calendar
- Gift Ledger
- Quince Insider
- Beauty Refill
- Cashmere Second Life

+3.3 pts repeat

3 Never pay twice

Pay only for customers who are incremental

- ★ **Never Pay Twice Engine**
- Loyalist Lookalikes
- Proof Creators
- The Fitting Room (pop-up)

Frees $9M · +0.9 pts

Trust thread The first order buys trust; the second spends it. Proof and access, never discounts

Adobe CJA engine B funds → A builds → C proves. No money moves until a CJA holdout proves it

90-day repeat	Target ≥ 30%
24% → 31%	

Blended CAC	Target −10%
−12 to −14%	

Contribution	Same $120M
+$25M / yr	

- ✓ **No budget increase**
- ✓ **No price-led retention**
- ✓ **Every move proven in CJA**

Market
Rented reach costs more every year

Customer
Buyers leave at three moments

Competition
Trust and consent take years to copy

Capabilities
Data ready; lifecycle muscle to build

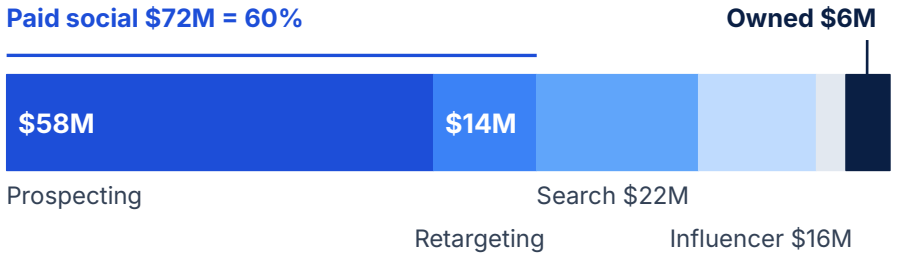

Source: Adobe CJA (Quince case data view, Jan–Apr 2026); case Exhibits D, G, H, J; team analysis. Impact figures are team estimates; repeat contributions are gross before haircuts.

Rented reach costs more each year; owned reach compounds

Quince G27

60% of budget sits on three social platforms

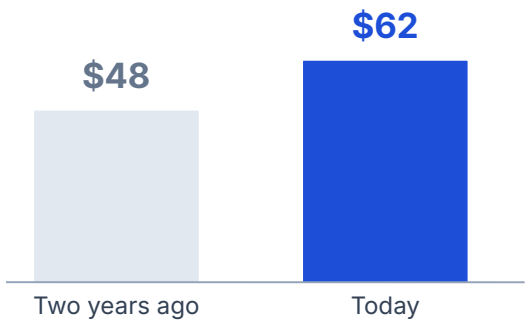

FY2026 paid marketing budget, $120M

Rules Quince doesn't control

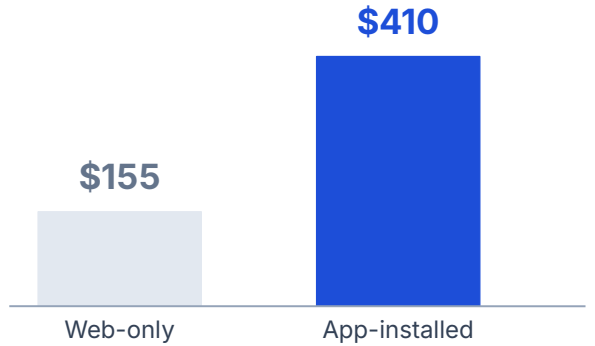

Blended CAC is up 29% in two years

Blended customer acquisition cost, $

Owned customers are worth 2.6× more

Estimated 3-year LTV per customer, $

Signal loss

iOS opt-in ~35–50%; Safari and Firefox block third-party cookies

Pixel retargeting pools shrink, and its $31 CAC is counted before any incrementality test

Our move: Never Pay Twice Engine

Platform concentration

Meta automates targeting by default; TikTok's U.S. ownership changed

60% of reach follows rules Quince can't set or predict

Our move: owned share 5% → 11%

Weak demand, rising prices

Consumer sentiment at a record-low 44.8; tariffs lift costs

Discounts would buy volume with the M2C margin, and are ruled out

Our move: Insider and Proof Creators

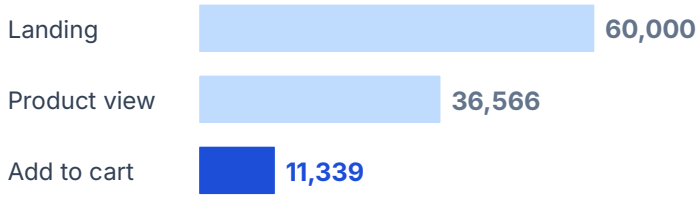

Quince rents 60% of its reach and spends just $1.43 per customer on the reach it owns

Source: case Exhibits B, D, G, H; Adjust and AppsFlyer ATT benchmarks; University of Michigan consumer sentiment (May 2026); Meta and TikTok public announcements.

Buyers leave at three moments; each needs its own move

Quince G27

Top of funnel Landing → cart

69% of product viewers leave without a cart add (A1)

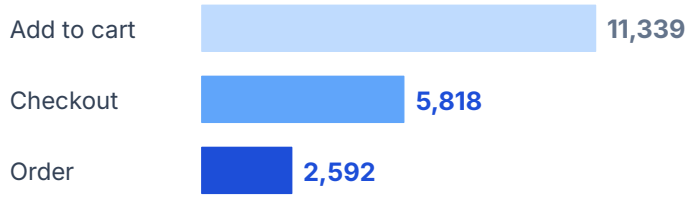

Why: Price signals quality

Half-price cashmere from a brand with no stores reads as too good to be true

Our move

- **Proof Creators**
- **Product-page proof**

Bottom of funnel Cart → order

77% of carts never order; 1 message follows 11,610 cart adds (A4)

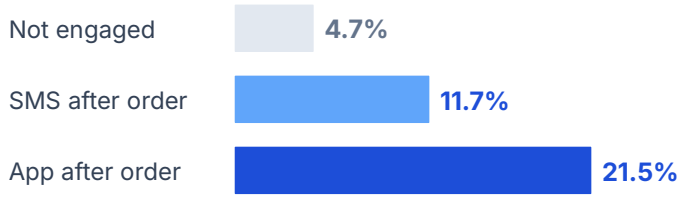

Why: Unfinished tasks fade

A saved cart is forgotten within hours if nothing reminds the buyer

Our move

- **Saved Cart**
- **Track It in the App**

After order one Order → second order

4.6× repeat for app users after order one; week-2 return 5.6% vs ~1% (A5, Cohort)

Why: Trust peaks at delivery

Habits form in weeks 1–4, and nobody buys a second sweater in spring

Our move

- **Quince Passport**
- **Material Journeys**

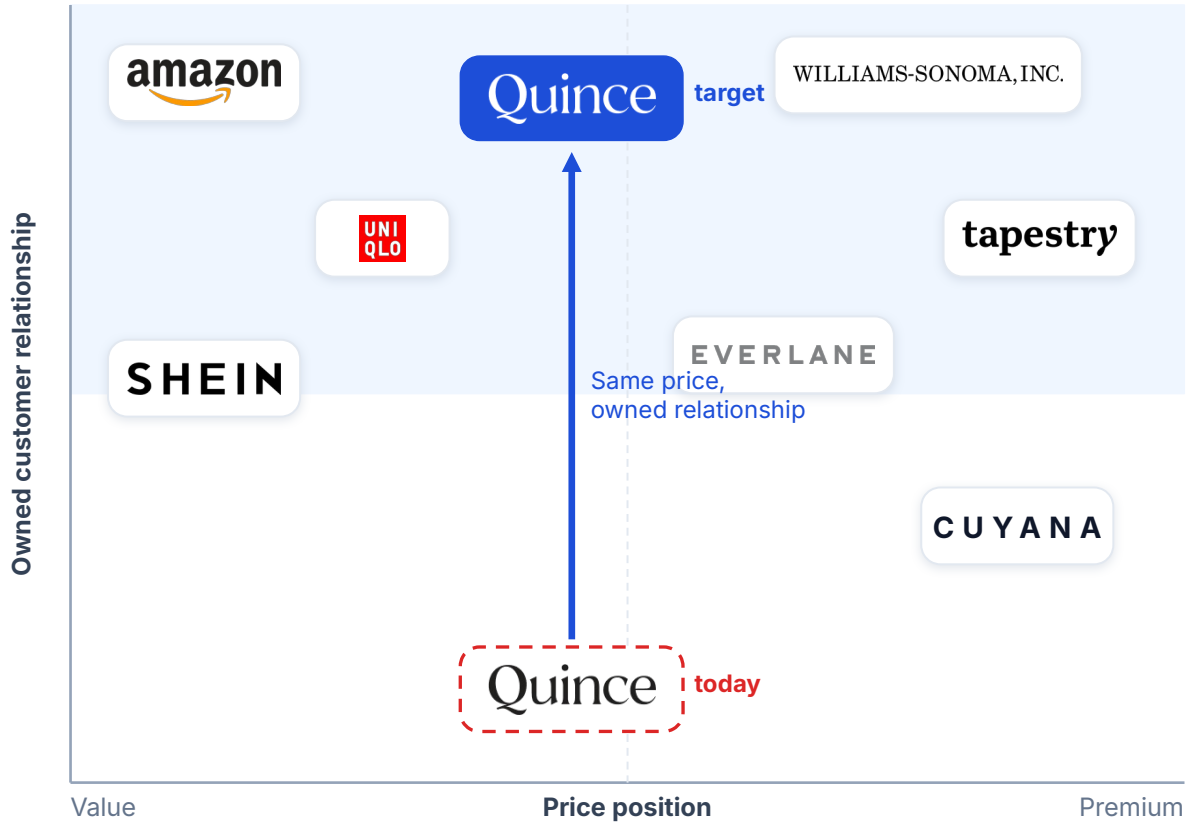

Category check (A6): cashmere buyers repeat at 13.7%, Home buyers at 20.8%, so the second order comes from a new category

Reach abandoners within hours, every buyer at delivery, engaged buyers in weeks 1–4, and cashmere buyers by day 21

Source: Adobe CJA, case data view, Jan–Apr 2026, 60,000 people (A1, A2, A4, A5, A6, Cohort Table); behavioural mechanisms are hypotheses the pilot tests.

Rivals copy tactics in a quarter; trust and consent take years

Quince G27

What each rival teaches Quince

UNIQLO	Copy the app's services (tracking, care, restock), not its app-only prices
EVERLANE	Lifecycle email alone is no moat: Everlane was sold to Shein in 2026
amazon	Never fight a paid-retargeting war; Amazon wins it on data and scale
WILLIAMS-SONOMA, INC.	Own the customer data layer; never name rivals in messages (lawsuit)

Quince's moat: what takes years to copy

M2C cost
Direct factories

Consented base
~480K newly engaged a year

Trust in hand
Passport, Fitting Room

If rivals discount, Quince holds price and proves quality; it wins as the value brand whose customers are known and reachable

Source: case Exhibit M; company filings and press (Shein acquisition of Everlane, May 2026; Williams-Sonoma v. Last Brand, dismissed 30 Sept 2026); positions are team judgment.

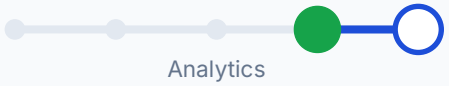

The data is ready; the lifecycle muscle must be built

Quince G27

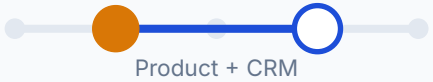

Readiness today and at month 9, and what each unlocks

Today · Month 9

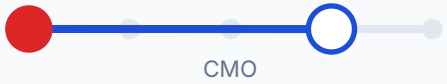

Data and identity
Unlocks: Never Pay Twice Engine, all 14 CJA tests

Activation and app
Unlocks: Passport, Track It in the App, Saved Cart

Lifecycle team and creative
Unlocks: Material Journeys, Care Calendar, Proof Creators

Measurement
Unlocks: holdouts on every tranche, weekly council

Incentives
Unlocks: Lever 3, by scoring incremental revenue, not ROAS

Operating model

Lever 1 · Capture	CRM and product
Lever 2 · Golden Month	Lifecycle marketing
Lever 3 · Never pay twice	Paid media + analytics
CJA engine	Weekly incrementality council

Funded inside the $120M: $7.5M

Owned-channel build, $M

- **$1.6M** Lifecycle team
- **$1.5M** Activation and sends
- **$1.2M** App: tracking, care
- **$1.2M** Creative
- **$1.0M** Recovery, product proof
- **$0.5M** Member perks
- **$0.5M** Measurement

Exhibit I prices the core rebuild at $2–3M inside today's $6M line

Every gap closes with money already in the budget; changing the scorecard removes the biggest blocker

Source: case Exhibits I and L; team assessment of readiness; owned-channel build sized at ~$200K per lifecycle role (team estimate).

Prove in 90 days, scale by month nine

Quince G27

90-day repeat

24% → ≥ 30%

Blended CAC

$62 → ≤ $56

Retargeting efficiency

Incremental orders per $

Monday: approve three things

Tranche 1, the South pilot and the weekly CJA council

We will not discount, add budget or cut prospecting without proof

Source: team plan; gate thresholds from the team's strategy; timelines from case Exhibit I. Tranche 3 moves only if a holdout proves prospecting is over-credited.

Appendix

01 Why a blend

02 Issue tree

03 Behavioural journey

04 Who to target, and when

05 Fourteen programs

06 Repeat-rate bridge

07 Budget reallocation

08 Value at stake

09 Attribution IQ insight

10 Risks and CJA screenshots

Each option covers another's weakness, so we blend all three

Quince G27

Option B

B Paid precision and suppression

- Results in weeks, $0 incremental
- Alone: High signal-loss exposure; builds no lasting relationship

Option A

A Owned lifecycle precision

- Lowest cost per touch; insulated from ATT
- Alone: Reach capped by today's list: 1 in 4 buyers engaged

Option C

C Attribution-based reallocation

- The lasting decision framework
- Alone: 6–12 months to trust; high change risk

Funds it
Suppression frees $4M in months 1–3

Builds it
Capture grows the list; journeys earn order two

Proves it
Runs from day 1 and decides every tranche

B's speed pays for A's build, A's owned reach cuts B's signal-loss exposure, and C's holdouts remove the measurement risk of both

Scale if the pilot beats the holdout by 2+ pts on 30-day repeat; stop and return the tranche if it doesn't

Source: case section 4 (Options A, B, C), Exhibit I (cost and timing) and Exhibit K (risk matrix); team analysis.

Four branches, three levers, one thread

Quince G27

Why is 90-day repeat 24% and blended CAC $62 on a fixed $120M?

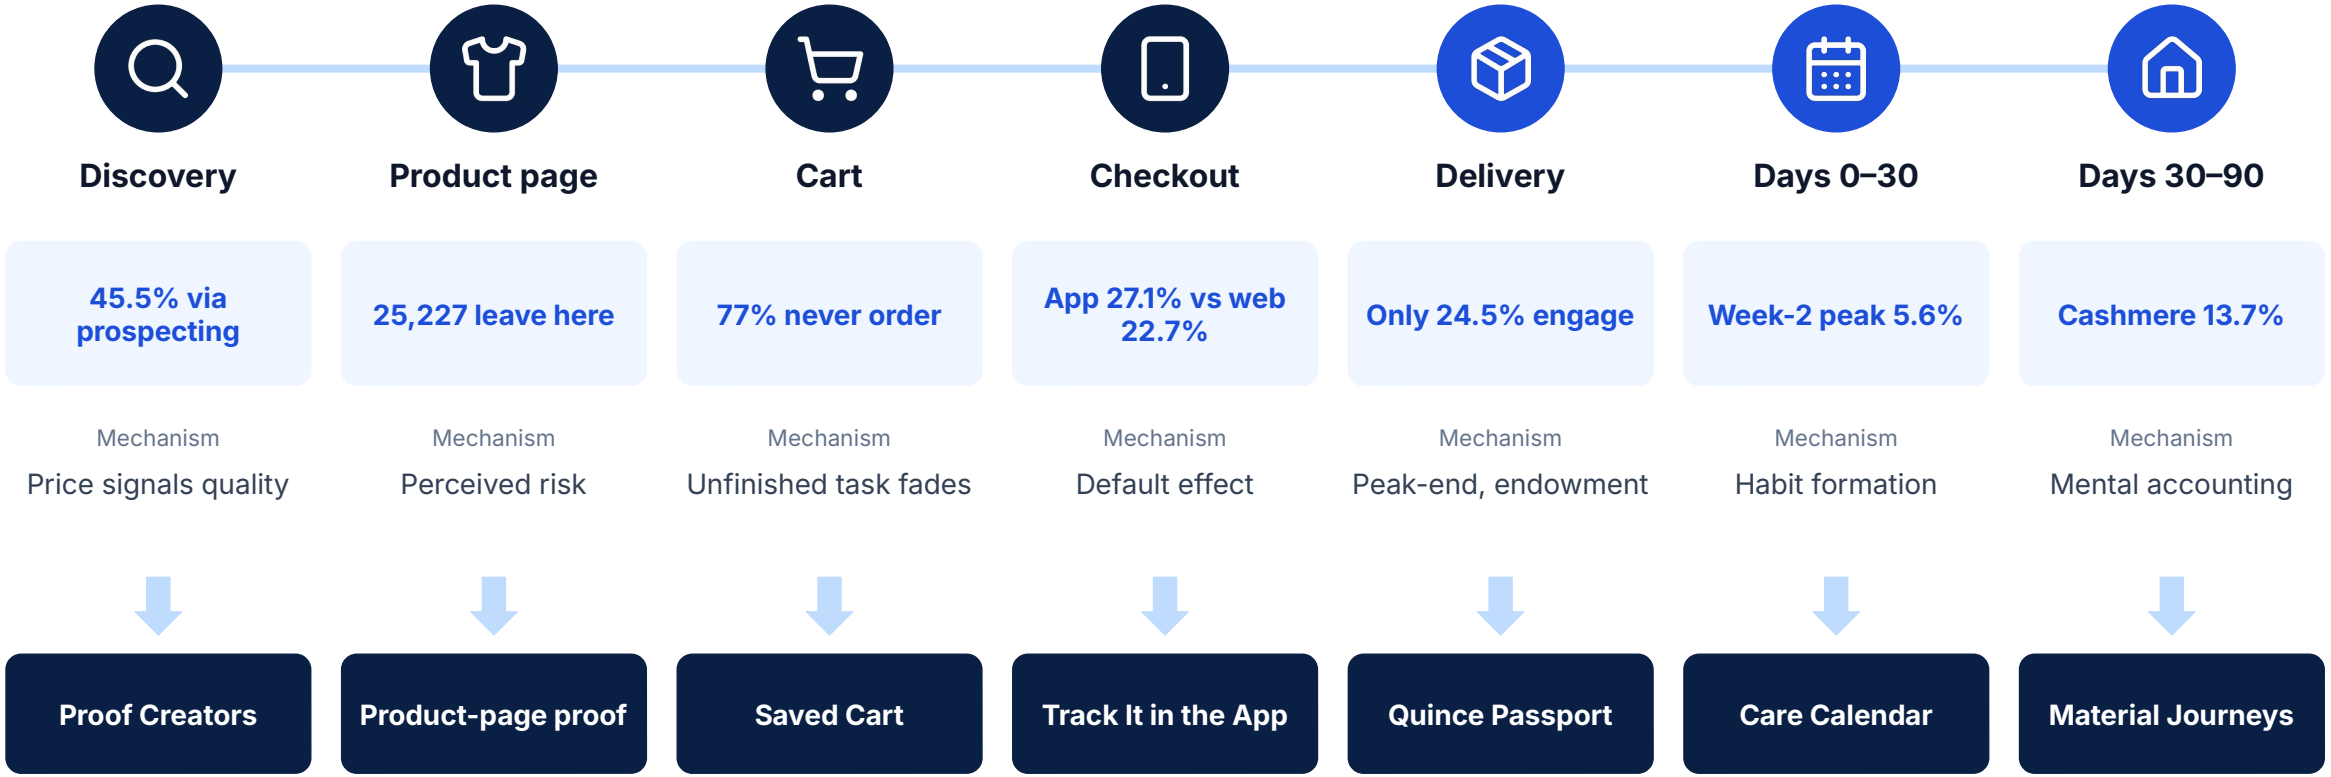

Money	**Spend is over-credited** Retargeted buyers repeat like organic: 23.0% vs 23.4%	**Never pay twice**
Customer mind	**One-product buyers** Cashmere: 40.7% of buyers, 13.7% repeat	**Win the Golden Month**
Customer journey	**The purchase leaks** 77% of carts never order; 1 message per 11,610	**Capture every buyer**
Brand trust	**Found, not yet trusted** 25,227 leave after a product view	**Trust thread, all levers**

Repeat = engaged share × engaged repeat + non-engaged share × non-engaged repeat; CAC = $120M ÷ new customers

Source: team analysis; Adobe CJA panels A1–A6; case Exhibits D and G.

Seven moments decide whether a first buyer returns

Quince G27

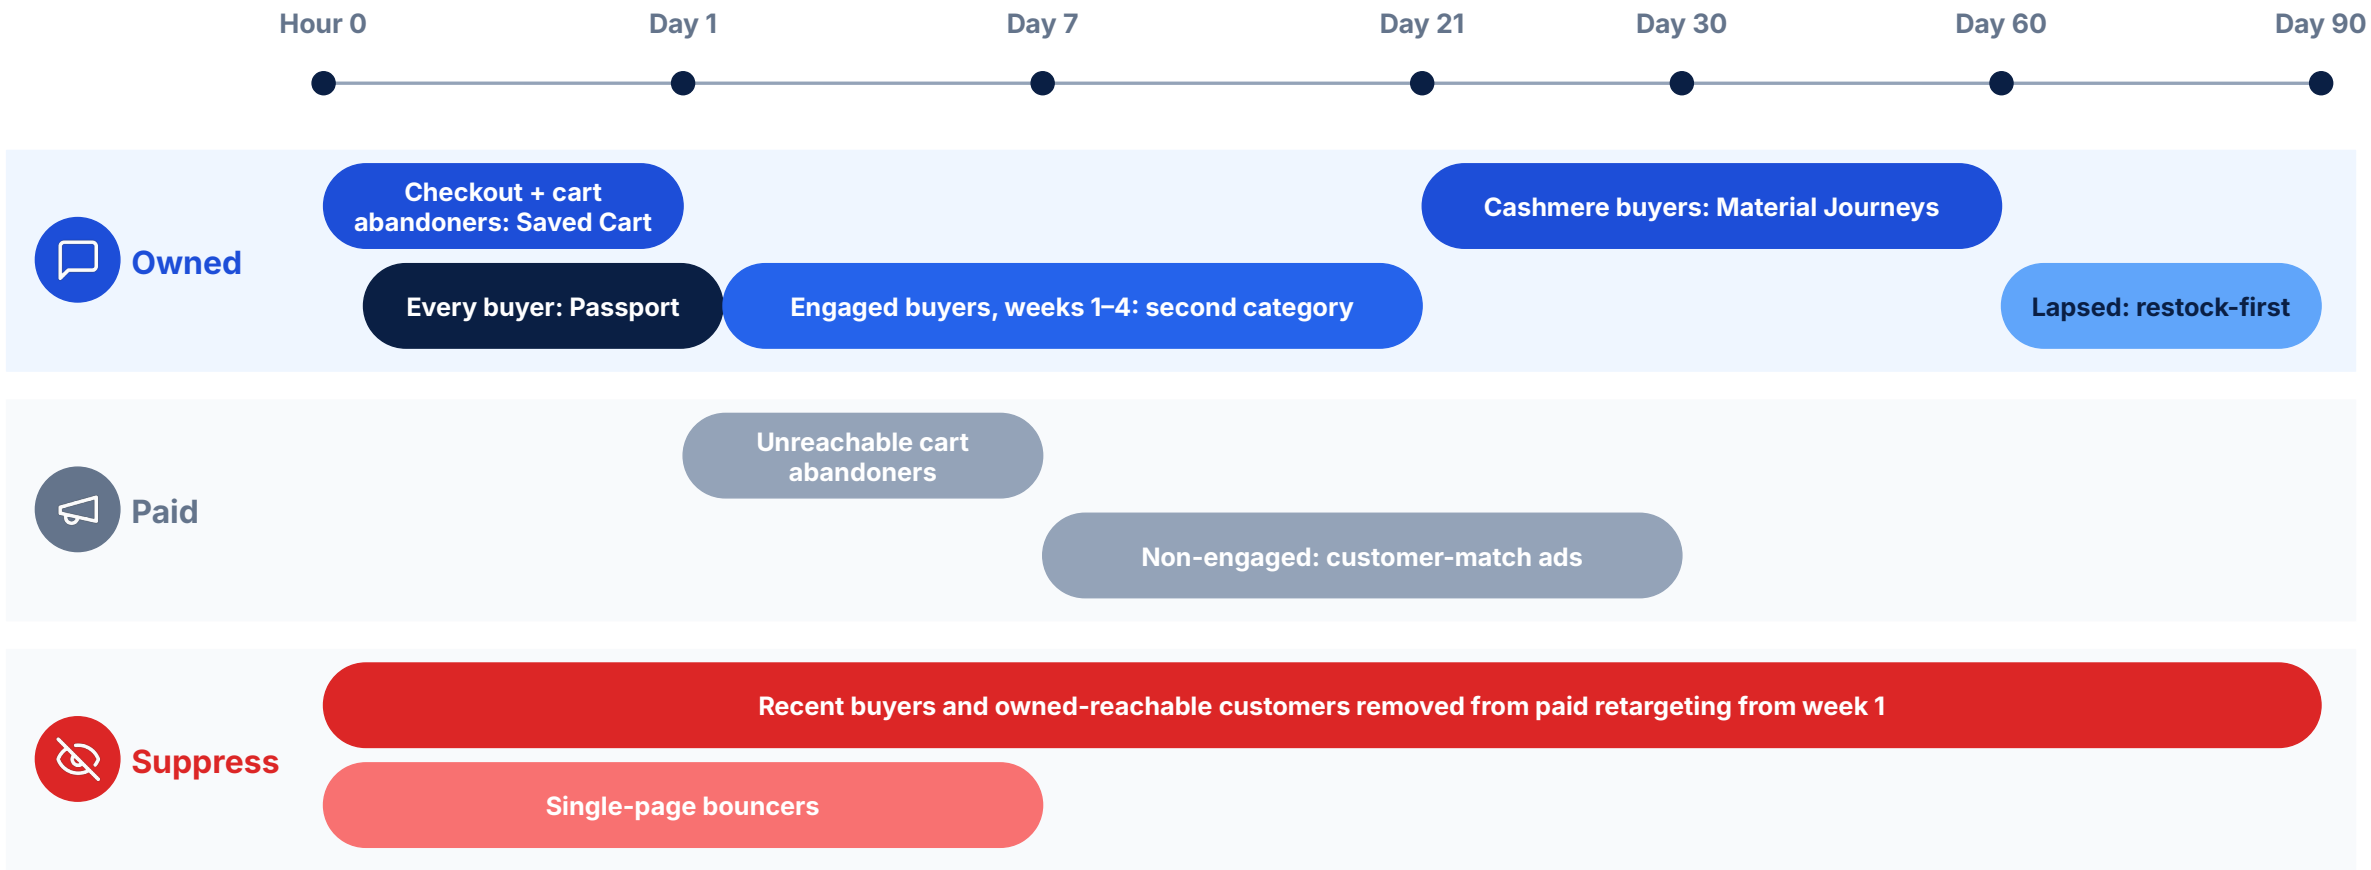

Trust peaks when the parcel opens: Quince asks for the relationship then, and never with a discount

Source: Adobe CJA panels A1, A2, A4, A5, A6 and Cohort Table; mechanisms are hypotheses the pilot tests.

Owned channels first; paid only where owned can't reach

Quince G27

Paid retargeting keeps one job: reaching high-intent people Quince has no other way to contact

Source: Adobe CJA segments (A1, A2, A4, A6, Cohort Table); team targeting plan. Every segment is a saved CJA segment that drives both message and measurement.

Fourteen programs, three flagships, zero discounts

Quince G27

1 Capture every buyer

★ Quince Passport
Box card: register your piece for care, exchange, restock-first

Track It in the App
Order tracking opens in the app by default; SMS fallback

Saved Cart
Reminders within hours with fit and return promise

Restock-First Waitlist
"Text me when it's back" for real sell-outs

2 Win the Golden Month

★ Material Journeys
Cashmere buyer → throw or linen sheets, by season

Care Calendar
Seasonal care reminders keep cashmere buyers close

Gift Ledger
Saved dates trigger picks 14 days before

Quince Insider
Early access earned by engagement, not spend

Beauty Refill
Refill reminders timed to each product's use cycle

Cashmere Second Life
Take-back for recycling, rewarded with early access

3 Never pay twice

★ Never Pay Twice Engine
CJA audiences suppress owned buyers from paid ads daily

Loyalist Lookalikes
Seed half of prospecting on repeat buyers

Proof Creators
Wear-tests and fabric close-ups, $1.5M from search

The Fitting Room
Members-only holiday pop-up; entry through the app

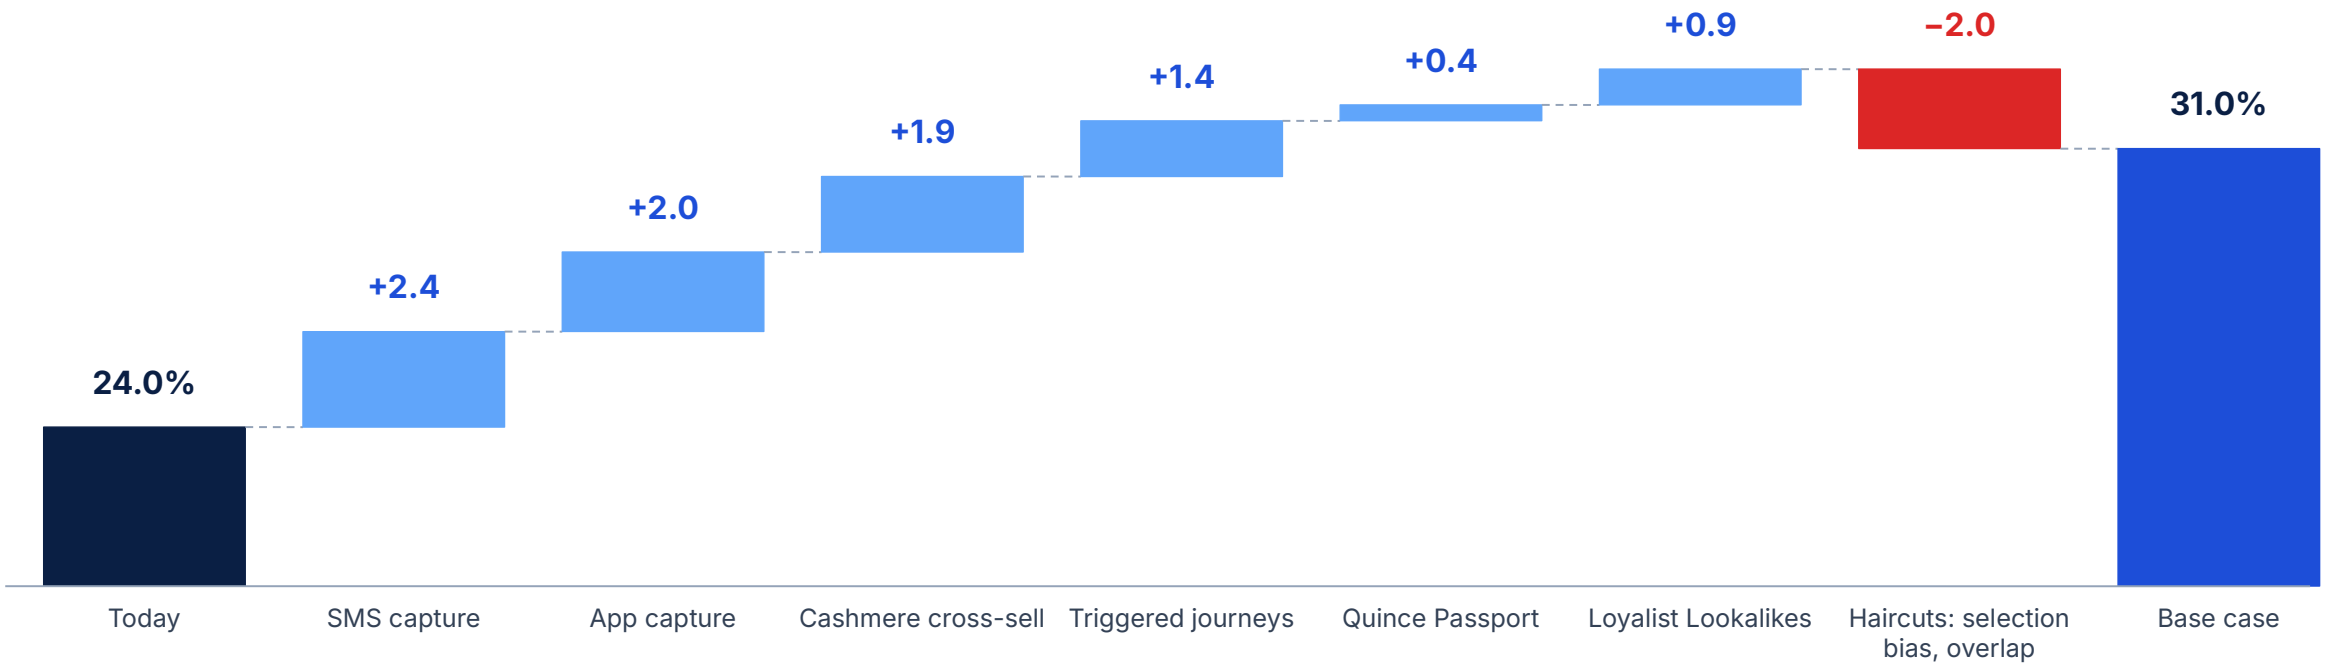

14 programs **0** discounts **14** CJA tests **$0** new budget

Source: team strategy. Each program sits inside one lever, works on one named behaviour and has a KPI CJA can read.

Seven levers lift 90-day repeat from 24% to about 31%

Quince G27

Gross	Base	Downside	Downside + buffers
33.0%	31.0%	29.5%	30.0%

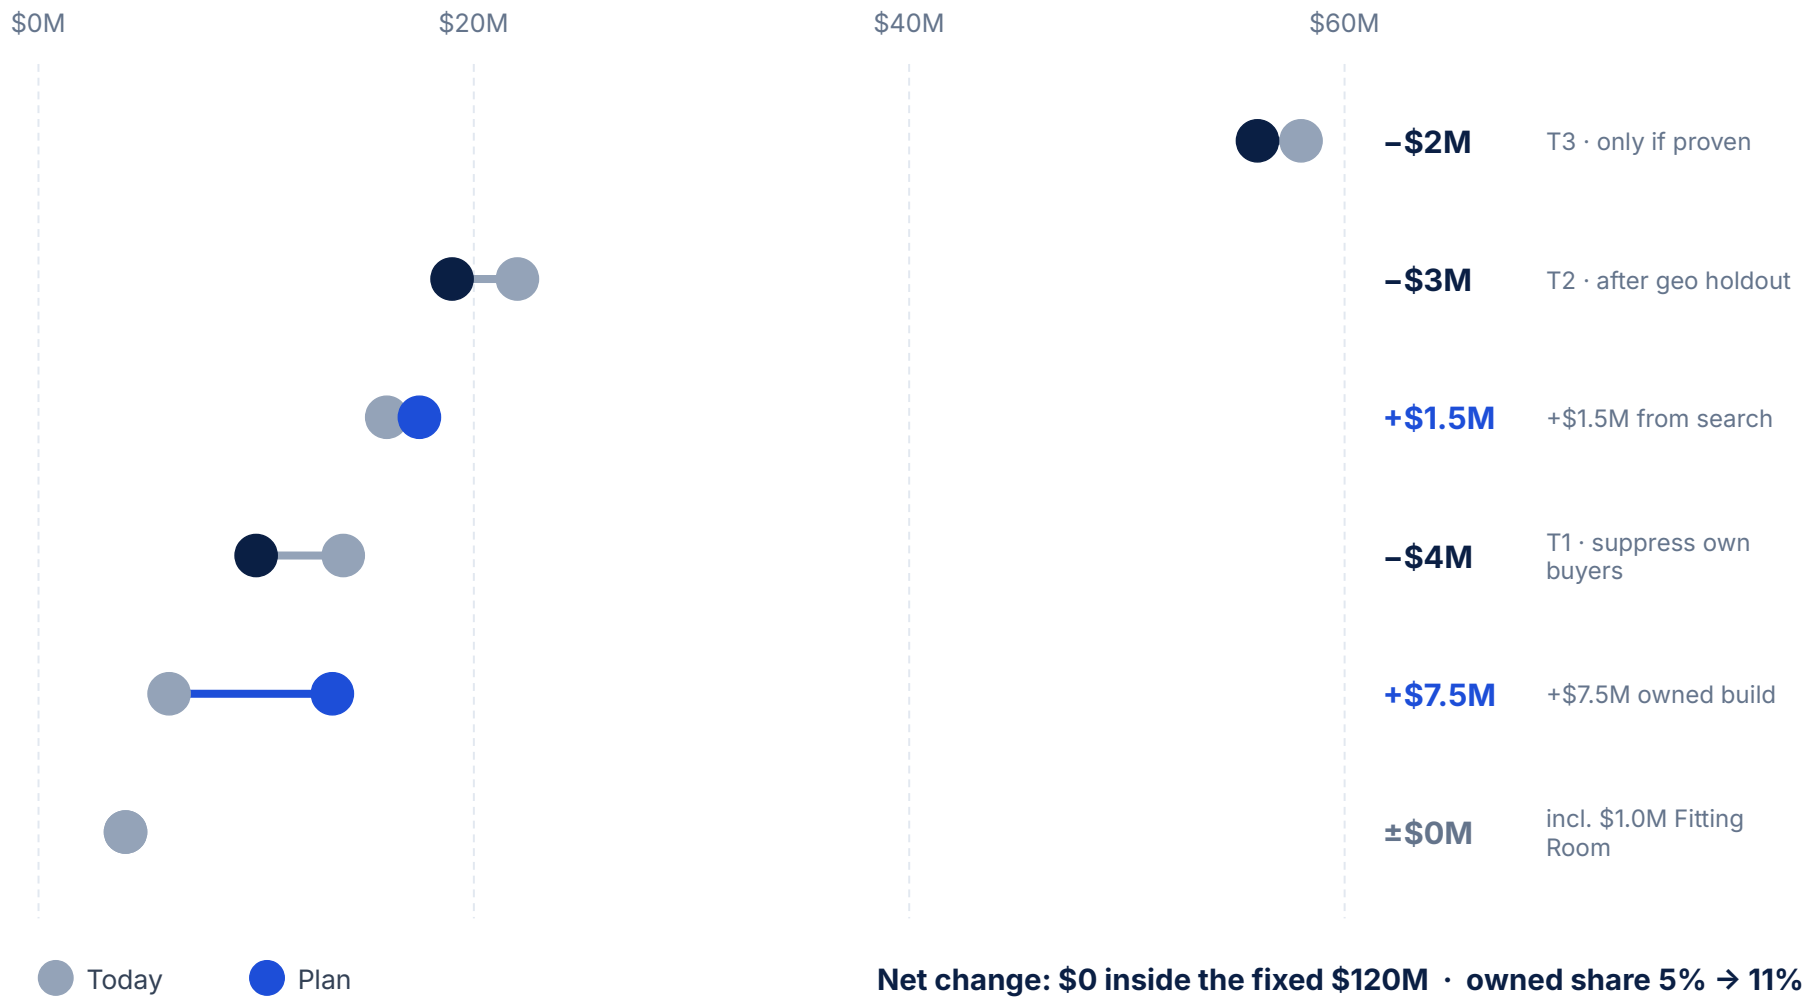

Axis starts at 20%

Source: case Exhibits E and J (baseline 24%); Adobe CJA A2/A5 for measured haircuts (app 17%, SMS 37%); new-lever sizes are team estimates.

$9M shifts from rented spend to owned channels

Quince G27

Paid social prospecting	–$2M	T3 · only if proven
Paid search	–$3M	T2 · after geo holdout
Influencer and creators	+$1.5M	+$1.5M from search
Paid social retargeting	–$4M	T1 · suppress own buyers
Email, SMS, app	+$7.5M	+$7.5M owned build
Brand and other	±$0M	incl. $1.0M Fitting Room

Net change: $0 inside the fixed $120M · owned share 5% → 11%

Source: case Exhibit G (today); team plan (tranches T1–T3 gated by CJA holdouts). Brand/other holds $4M, of which $1.0M funds the Fitting Room test.

The same $120M earns about $25M more contribution a year

Quince G27

Contribution added per year, $M

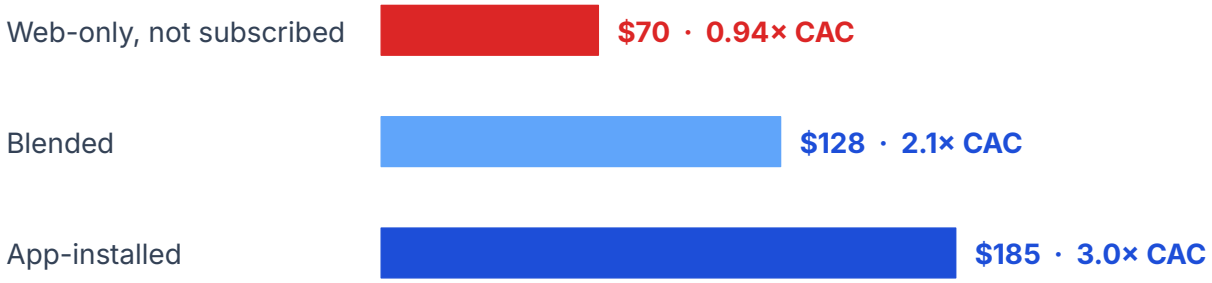

≈ $25M

Repeat at +7 pts

~170K extra new customers

Lifetime margin per customer vs CAC

3-year LTV × 45% margin, $; web-only vs prospecting CAC $74, others vs $62

Blended CAC, measured two ways

Effective CAC (case's Exhibit J measure)

$62 → ~$54 **–12% to –14%**

Strict new-customer CAC

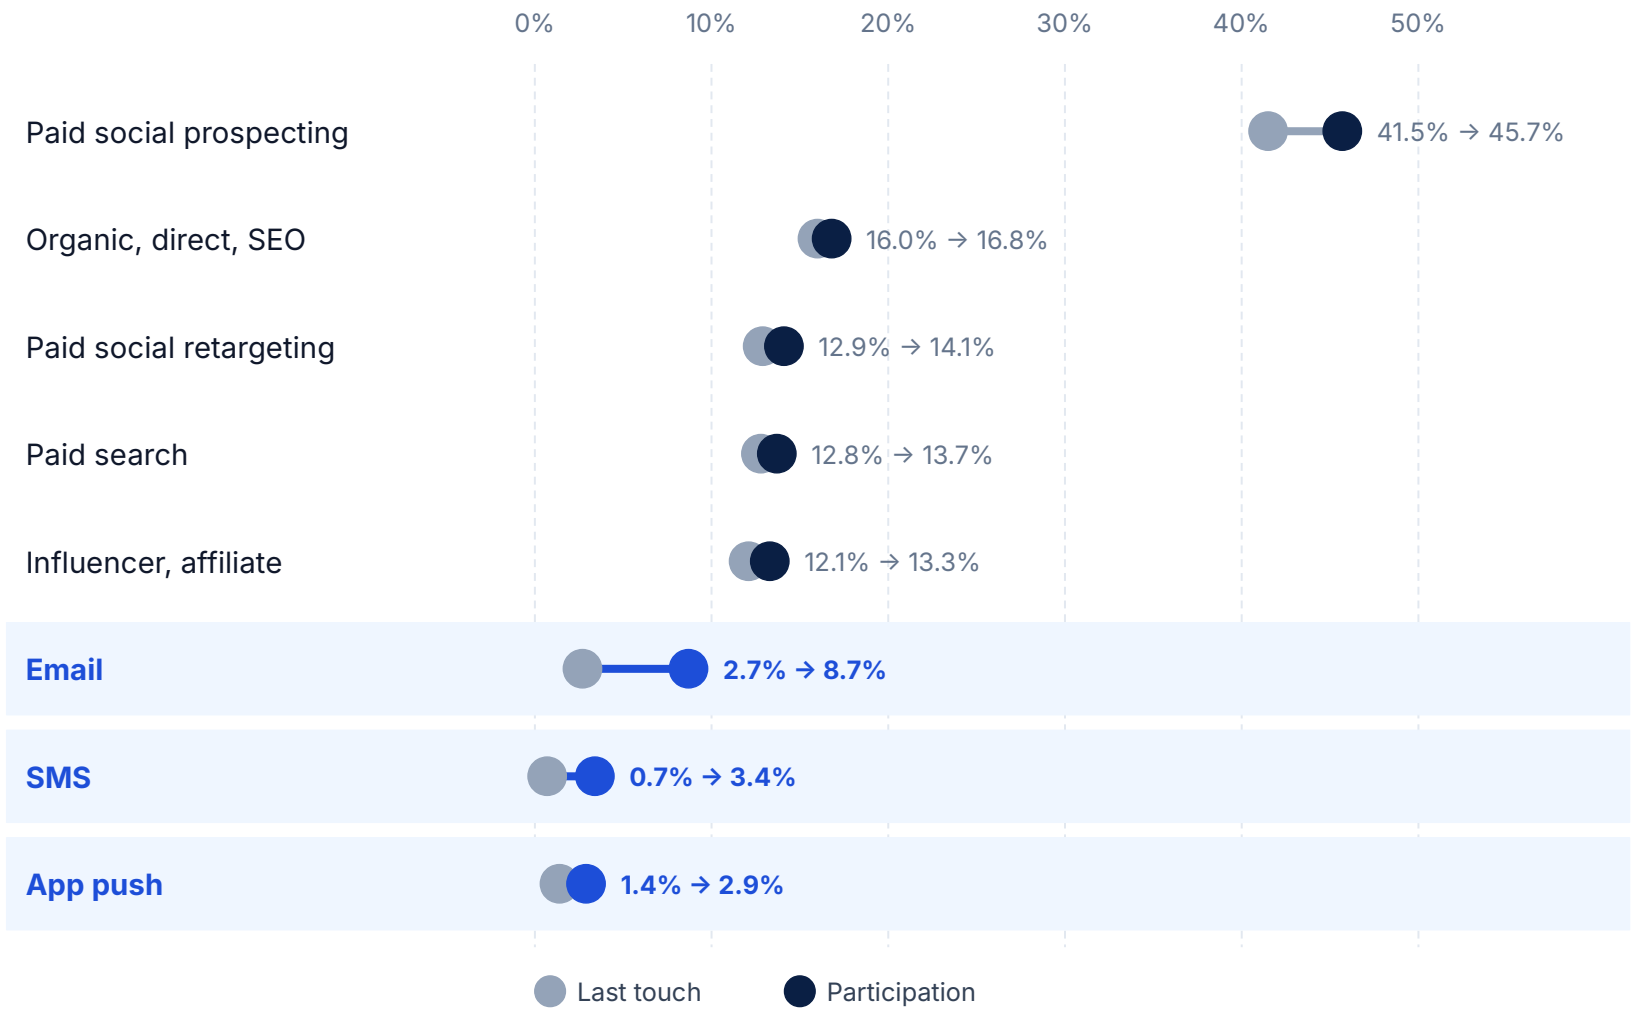

$62 → ~$57 **≈ –8%**

Converting one web-only buyer into an app user is worth about $115 of margin, almost two new-customer CACs

Source: case Exhibits H and J (45% contribution margin, $13.5M per 6 pts of repeat); strict CAC = $120M ÷ new customers; team estimates.

Last click undervalues owned channels about three times

Quince G27

4.8% → 15.0%

Owned channels: last-touch credit vs share of revenue they take part in

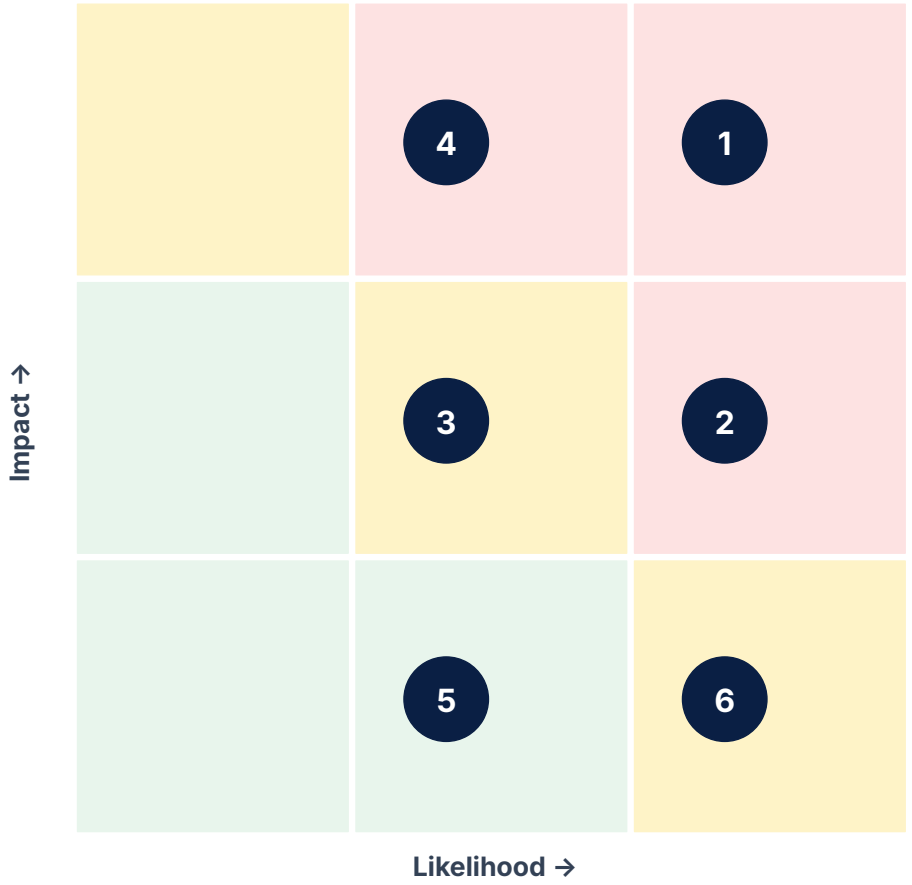

12.9% → 12.4%

Retargeting barely moves from last to first touch, so its cut rests on holdouts, not attribution

Source: Adobe CJA Attribution IQ, Order Revenue ($337,044), Marketing Channel, Person container, 90-day lookback, 1 Jan–30 Apr 2026.

Six risks, each with a mitigation and an early warning

Quince G27

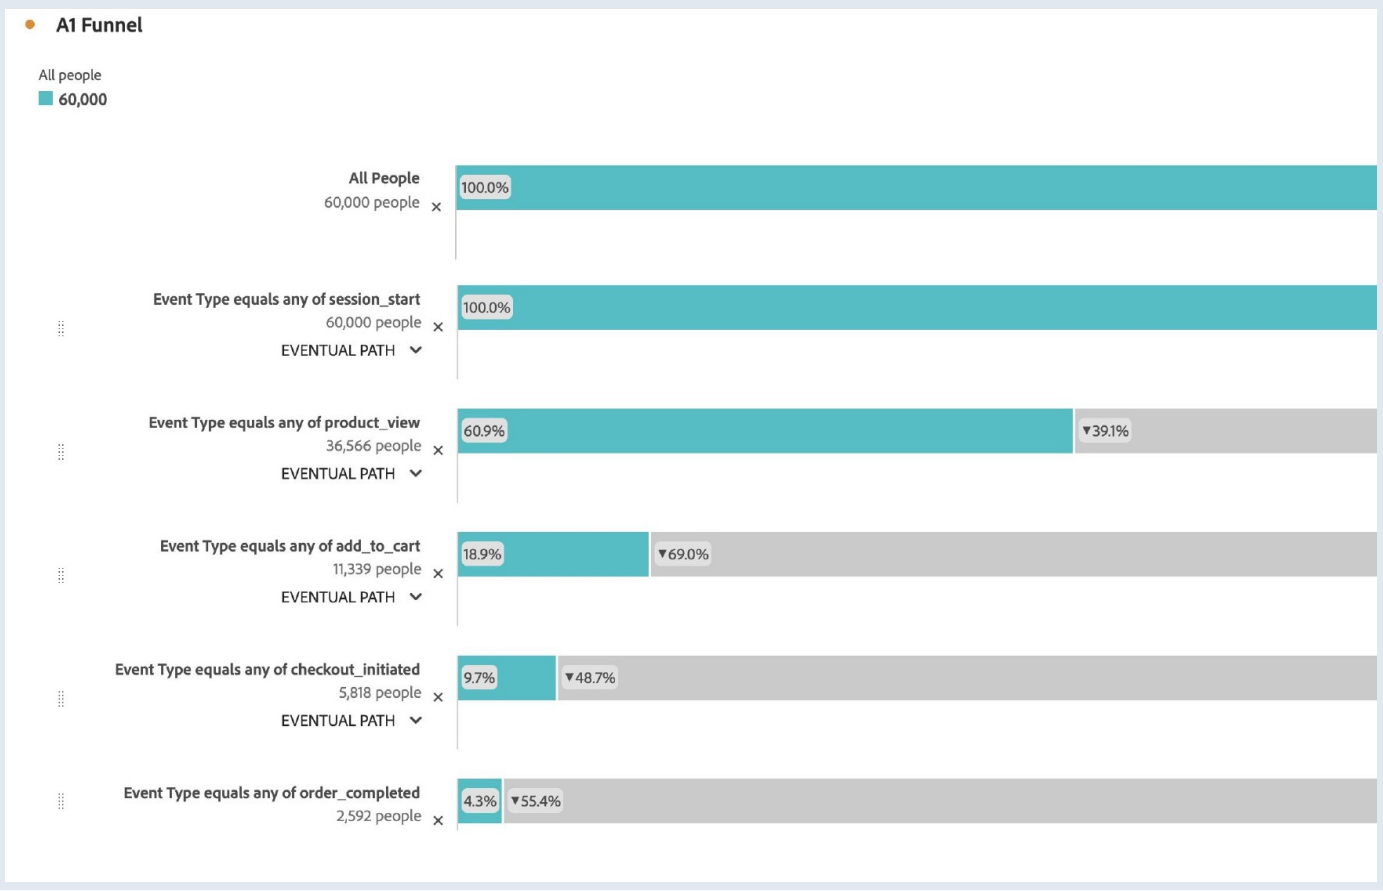

1. **Selection bias inflates lift**
   Randomized 10% holdout; A5 haircut built in
2. **Channel owners resist cuts**
   Scorecards move to incremental revenue
3. **Message fatigue, unsubscribes**
   Fewer, triggered sends; guardrail pauses tranche
4. **Consent and privacy (TCPA, CCPA)**
   Transactional and marketing consent split
5. **Fitting Room doesn't pay back**
   One-season test; stops if it loses to Passport
6. **Platform or signal shock**
   Owned share 5% → 11%; suppression by lists

Source: team analysis; case section 7 risk matrix. Positions are team judgment.

Fallout: 77% of people who add to cart never order

Quince G27

Fallout (A1): 60,000 → 2,592 buyers; 69% leave after a product view and 77% of cart adders never order, so recovery is new money

Source: Adobe CJA, Fallout visualization, Quince case data view, 1 Jan–30 Apr 2026.

Attribution IQ: owned channels assist far more than they close

Quince G27

Order Revenue Attribution Comparison

Marketing Channel Page: 1/ 1 Rows: 10 1-8 of 8	Order Revenue Last Touch | Person | 90 Days Jan 1 – Apr 30 $337,044 out of $337,044	Order Revenue First Touch | Person | 90 Days Jan 1 – Apr 30 $337,044 out of $337,044	Order Revenue Linear | Person | 90 Days Jan 1 – Apr 30 $337,044 out of $337,044	Order Revenue Participation | Person | 90 Days Jan 1 – Apr 30 $337,044 out of $337,044
1. Paid Social Prospecting	$139,932 41.5%	$143,356 42.5%	$143,588 42.6%	$153,968 45.7%
2. Organic / Direct / SEO	$53,763 16.0%	$47,758 14.2%	$50,192 14.9%	$56,763 16.8%
